VANS SNOW 2026/27

Welcome to Winter 2026-2027. A season is about reconnecting ... with our riders, with our products, and maybe even with the reasons that brought us into the snow in the first place. This season is an opportunity to push forward through product, while staying grounded in what has always made Vans Snow different: Performance built with purpose, stories rooted in the wide-reaching corners of this culture, and uplifting a team that continues to shape the direction of where snowboarding goes next.

Newness leads the way through the redesign of key franchises and new models, pushing new tech, bringing fresh energy and updated function to some of the most trusted boots on snow. We proudly introduce our first women's signature Snow collection in over 25 years with Mia Brookes. We also sat down with four of our global team riders, each bringing a distinct perspective shaped by their culture and through their style, and invited them to express that through co-curated colorways on their favorite models. Late nights, real conversations, endless debates, and the countless laps—this season is a reflection of our riders, product progression, and fueling the culture forward!

Enjoy! And see you out there!

—The Vans Snow Family

THE MIA BROOKES SIGNATURE COLLECTION

This is a special one. It's been over 25 years since we've had a female signature product in the Vans Snow line, and the Winter 2026-2027 collection changes that.

A two-time world champion and X Games gold medalist, Mia has been a driving force in snowboarding's progression, and is truly one of a kind. If there was ever a reason to dust off our signature playbook and give an athlete the space to help us build a ground-up collection, it's Mia.

THE VERSE 2.0 FEATURING BLAKE PAUL

Our crown jewel. For Winter 2026-2027, we set our sights on a ground-up redesign that explores a new fit, a new volume profile, an updated flex pattern, weight reduction, and a new closure system. An ambitious journey, to say the least, which is exactly why we've pulled in Blake Paul. He has the uncanny ability to articulate a rider's needs in a product's construction and performance. There's getting it right, and then there's getting it "Blake right". Not only did he help to create and validate this new model's performance, but he's also supporting the launch through a co-curated color story as well—a blacked-out theme with a contrasting underlay fade of ink blues. Subtle below the cuff, yet eye-catching on the shelf.

PHOTOGRAPHY BY: OLI GAGNON

BLAKE PAUL & RYO AIZAWA

THE INFUSE SIDELINE LX FEATURING RYO AIZAWA

As creative as he is on a snowboard, Ryo might even be more creative off one. From our first experience working with Ryo to help launch the Super Standard, we knew right away we wanted to work with him again. When he mentioned that he'd been riding the Infuse Sideline, we immediately began to wonder how he might interpret that model. Welcome to the Infuse Sideline LX—a blend of elevated materials, custom trims and hardware, plus a new outsole that all comes together to bring a premium expression to the Infuse family.

THE INVADO PRO 2.0 FEATURING RENE RINNEKANGAS

One of the most devoted supporters of the Invado Pro, Rene was top of mind when we made the decision to reimagine the Invado franchise. Winter 2026/2027 introduces a brand new Invado OG and Invado Pro to the Vans Snow line, and there was no single rider better to help launch this new design than the King of the North. Rene's concept is really about subtle, discoverable details. A black theme with a pop-contrast stitch, trims, and treads. Custom art embroidered throughout the quarters, and Rene's debossed art running up the spine. The longer you look, the more you'll find!

PHOTOGRAPHY BY: OLI GAGNON

KENNEDI DECK

THE LUNA PRO 2.0 FEATURING KENNEDI DECK

Kennedi has been putting in the work, and the results have been impossible to ignore. Two recent covers, a standout video part, and a newly released pro model boot kind of speaks for itself! And the craziest part? There's no sign of this slowing down. When we sat down to choose the riders we wanted to build with for the 2026/2027 season, Kennedi was an easy, unanimous choice. They came to the table with a fully formed concept: A well-worn look inspired by vintage, sun-bleached colors and broken-in canvas, and Kennedi was excited to tell this through the new Luna Pro 2.0. It feels unmistakably Kennedi, and saying it's well deserved is an understatement.

PHOTOGRAPHY BY: OLI GAGNON

JILL PERKINS

THE SUPER STANDARD & CORE EXCLUSIVE FEATURING JILL PERKINS

Jill has been a long-standing collaborator with Vans Snow, and for a very good reason. She embodies everything we love about this culture, and brings so much style and influence both on and off the board. She's amazing to work with, has a sharp design point-of-view, and has been keeping busy on a two-year film project. That alone made it a pretty easy decision to select her to lead the color conception for the Winter 2026/2027 Core Exclusive program. Anchored by the Super Standard as the hero model, Jill came in with a color theme built around a Hunter Green canvas base, contrasted against worn-in premium black leather. This season's Core Exclusives will include both Men's and Women's Super Standard models, an Infuse, and a Progress.

Technology

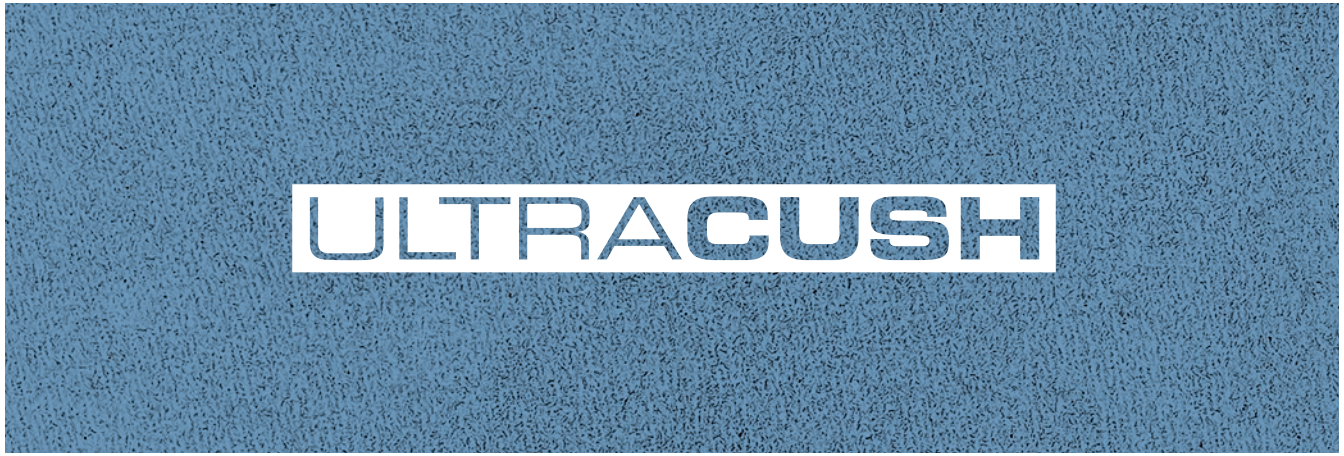

POPCUSH™

Won't pack. Pops back.
Vans' highest level of impact cushioning coupled with energy return for snowboarding, skateboarding, or BMX.

ULTRACUSH™

UltraCush is a performance foam compound developed by Vans for enhanced comfort and reduced weight.

VANS POPCUSH™ V-SERIES FOOTBEDS

Comfort and support are the foundation of snowboard boots, and the POPCUSH V-Series footbeds from Vans define both. With advanced 3D anatomical shaping and an anti-fatigue PU materialization and design, these footbeds offer an innovative formula that provides tuned energy return and the highest levels of impact cushioning. Tested and approved by our team riders, the POPCUSH V-Series footbeds deliver the kind of comfort and performance that only Vans can provide.

"POPCUSH provides the perfect balance of comfort and support to keep my feet happy all day, whether it's lapping bumpy conditions at the resort or battling tricks in the backcountry."

—Blake Paul, Vans Snow Team Rider

V3 POPCUSH FOOTBED

- Tri-density POPCUSH construction
- OrthoLite® open-cell foam top layer
- TPU arch support heel clip provides stability while allowing torsional flex
- Advanced 3D-molded anatomical shape
- Anti-fatigue coring design
- Airflow perforations
- Nylex moisture-wicking top sheet

V2 POPCUSH FOOTBED

- Dual-density POPCUSH construction
- TPU arch support heel clip provides stability while allowing torsional flex
- Advanced 3D-molded anatomical shape
- Anti-fatigue coring design
- Airflow perforations
- Nylex moisture-wicking top sheet

V1 POPCUSH FOOTBED

- Single-density POPCUSH construction
- Advanced 3D-molded anatomical shape
- Anti-fatigue coring design
- Airflow perforations
- Nylex moisture-wicking top sheet

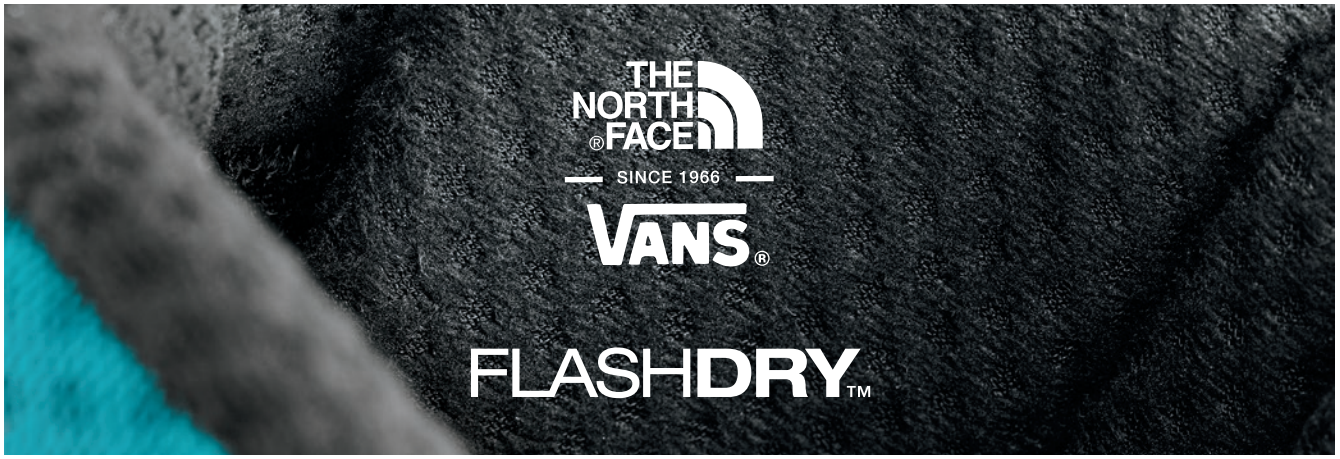

YOUTH ULTRACUSH GROW-WITH-YOU SHIM

Designed for growing feet, this practical youth footbed sits atop a second built-in footbed and can be removed as the foot size grows, adding a half-size of extra room and extending the life of the boot.

VANS / TNF FLASHDRY™

Vans and trailblazing outdoor innovator The North Face® continue their partnership on the first-to-market FlashDry-equipped snowboard boot liner. FlashDry fabric technology is engineered to act like a second skin, pushing moisture to the surface and eliminating it as fast as possible. These fabrics are engineered to repel and resist wetting out to help provide quick-drying performance that keep the user dry and comfortable. Setting a new industry standard in moisture management and all-conditions comfort, this technology has now been integrated into all of the Vans V3 UltraCush™ TNF FlashDry liners.

VANS / SMARTWOOL®

Vans continues our partnership with the Merino wool experts at Smartwool with the V2 UltraCush™ Smartwool liner, made with soft, odor-resistant, moisture-managing Merino wool to keep you feeling dry and comfortable even in the deepest powder. Merino wool is warm yet breathable—helping to maintain a dry, thermoregulated microclimate inside your boot. As your body heats up, sweat vapor is quickly absorbed by the wool fiber and transported away from your skin. A Merino fiber can absorb and retain up to 30% of its own weight in moisture and still feel dry to the touch. This makes it perfect for everything from long runs on groomers to backcountry explorations. Forget about heading in early—the V2 UltraCush™ Smartwool liner will help you stay warm, dry, and ready for the last chair.

VANS V-SERIES ULTRACUSH™ LINERS

Our mission with the entire offering of V-Series liners is to have a simple and comfortable way to optimize boot fit and performance. Fewer seams, UltraCush-level comfort packages, and neoprene flex zones are just a few of the features that set Vans liners apart. These designs represent the most advanced concepts ever delivered from Vans. As in previous years, all V3 liners incorporate The North Face's FlashDry™ technology, and all V2 liners come outfitted with Smartwool® Merino wool. Be prepared to reset your expectations.

V3 ULTRACUSH TNF FLASHDRY LINER

- UltraCush interior cushioning layer
- The North Face FlashDry materialization
- Expanded Comfort Flex neoprene forefoot
- Updated X-Cage for superior heel hold
- Dual-density, heat-moldable core
- Closed-seam microsuede cuff and tongue

V2 ULTRACUSH SMARTWOOL LINER

- UltraCush interior cushioning layer
- Smartwool Merino wool materialization
- Extended Comfort Flex neoprene toe box
- Updated X-Cage for superior heel hold
- Dual-density, heat-moldable core

V1 ULTRACUSH LINER

- UltraCush interior cushioning layer
- Dual-density, heat-moldable core
- Comfort Flex neoprene toe box
- Closed-seam brushed fleece cuff

X-CAGE

This heel lock component offers an asymmetrical, anatomical shape that fills the space around your ankle bones with a soft durometer EVA foam.

Available on the V2 UltraCush Smartwool and V3 UltraCush FlashDry liners, the X-Cage is designed to keep your foot securely in the heel pocket and in constant contact with your snowboard.

VANS V-SERIES SNOWWAFFLE OUTSOLES

Vans SnowWaffle outsoles are engineered to optimize two things: boardfeel and traction. A quality connection to your snowboard provides the ability to be both proactive and reactive. In parallel, balancing traction needs from parking lots and lift lines to backcountry hikes is paramount to our SnowWaffle outsoles, and 50+ years of traction development technology from Vans helps to inform these designs.

V3 SUPERRADIAL WAFFLE OUTSOLE

A new compliment to the V3 family, the SUPERRADIAL means more feel, more grip, zero compromise. A lower-profile midsole sharpens board feel, radial Hex Lugs and ALL-TRAC Rubber bite in every direction, and an ESS Shank adds torsional support. An expanded impact zone, improved binding fit, and a molded TPU toe pick round it out.

- New radial-oriented hex lugs for omni-directional grip
- ESS shank for torsional support
- Expanded impact-absorption zone
- Improved geometry for better binding fit
- ALL-TRAC Rubber Compound
- Molded TPU toe pick

V3 SUPERENDURO WAFFLE OUTSOLE

Inspired by the extended cross-country and off-road demands of moto enduro racing, the V3 SuperEnduro outsole is designed to offer maximum performance in and out of your bindings. Multi-directional tread design? Surface-level texturing? A TPU toe pick? Check, check, and check. There's no keeping up with this all-terrain apex predator.

- ALL-TRAC Rubber Compound
- Molded TPU toe pick
- Multi-directional, dynamic lug tread pattern
- Surface-level waffle ripple for added traction and snow shed
- UltraCush Lite midsole construction with mid-foot support shank
- Expanded impact-absorption zone

ALL-TRAC

All-Trac is a formula-based, proprietary rubber compound developed by Vans. This specialized cold-weather recipe is optimized with increased flexibility, which allows lugs to bend with terrain changes, creating more surface area and better variable adaptability.

V2 WAFFLE PRO

The V2 Waffle Pro is a progressively inspired and capability-driven design built for both on- and off-snowboard performance. Uncompromising natural flex and a weight-reducing, impact-resistant UltraCush midsole provide incredible boardfeel, while a Vans-exclusive pattern and rubber compound give you the confidence you need to scramble the side country with confidence.

- ALL-TRAC Rubber Compound
- Dynamic lug tread pattern features a siped tire-like design for increased traction
- Toe picking treads and a higher toe bumper for grip and protection
- UltraCush Lite midsole construction for lightweight, impact-absorbing performance

V1 WAFFLE LUG

The original Vans waffle outsole is an iconic skate classic, and the V1 Waffle Lug outsole pays tribute to the timeless vulcanized look that put Vans on the map. Expect high levels of boardfeel and traction from the Waffle Lug outsole.

- ALL-TRAC Rubber Compound
- Aggressive reverse waffle lug pattern for all-mountain and street performance
- Vans' special recipe rubber compound for all-condition traction

LINERLESS TECHNOLOGY

The bottom line: Linerless technology redefines simplicity and modern comfort. Its lightweight construction and slimmed-down upper reduces a boot's overall size and weight. An increased internal foam package provides a softer, more cushioned feel. Without internal harnessing, riders will experience unmatched ease in and out of the boot. A calculated combination of support and free-flex articulation makes linerless technology ideal for performance, street, or park riders choosing the Hi-Standard™ DX boot, or skill- and price-conscious riders looking for value and comfort in the new Aura, Encore, Hi-Standard™, or Juvie linerless models.

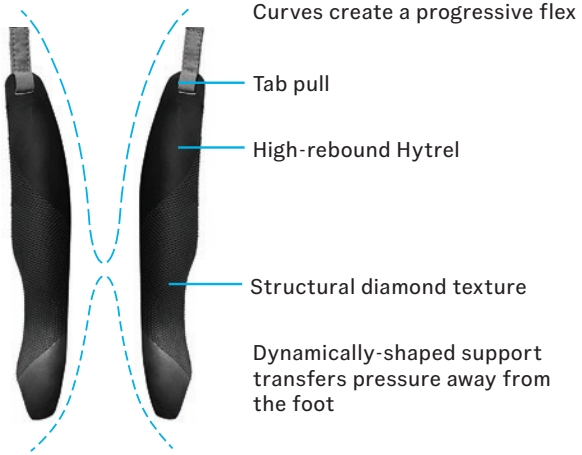

VANS FLEX CONTROL SYSTEM (PATENT PENDING)

Our removable, high-rebound Hytrel® tongue stiffeners enable riders to custom-tune their boot flex. Keep both in for maximum support, use just one for increased lateral or medial response, or take them both out for a softer-flexing boot. As your boots soften up over time, add the tongue stiffeners back in to extend the life of your boots.

REMOVABLE INTERNAL TONGUE STIFFENERS

THE BOA® FIT SYSTEM

Vans has backed BOA since day one. As the proven leader, the BOA® Fit System delivers a micro-adjustable, precision fit that's engineered and guaranteed to perform in the toughest conditions. The new H5 dial platform offers a multi-directional and mirrrored functionality to improve the user experience. Turn the dial one way to tighten, and if you over did it a little, just turn the dial the opposite direction to reduce tension. Top to bottom, our latest range of BOA® boots is our best collection to date.

BOA®
DIALED IN. PRECISION FIT.

THE BOA® GUARANTEE

BOA® DELIVERS

DIALED-IN PERFORMANCE AND MICRO-ADJUSTABLE, PRECISION FIT.

Dialed-in, micro-adjustable precision fit designed to give riders the freedom to adjust tension and regulate boot flex. Engineered to withstand impact from the most demanding riders, BOA delivers uncompromising durability in the park or technical backcountry terrain.

THE BOA® FIT SYSTEM FEATURING VANS CUSTOM FOCUS PLUS

Custom Focus Plus features two high-power (H5) dials that control three zones of fit linked by Vans' exclusive Custom Slide Guide, delivering concentrated fit around the instep area for superior heel hold.

THE BOA® FIT SYSTEM FEATURING VANS CUSTOM FOCUS

Custom Focus features a high-power coiler dial (H4) and a mid-power remote dial (M+2) to control three zones of fit linked by Vans' exclusive Custom Slide Guide, delivering concentrated fit around the instep area for focused heel hold.

VANS HYBRID AND HYBRID PLUS SYSTEMS FEATURING THE CUSTOM SLIDE GUIDE (PATENT PENDING)

Both Hybrid fit systems put comfort and control at your fingertips. This tech combo enables adjustable flex control and powerful heel hold through the instep area using the Custom Slide Guide. Simply slide it to where you need it ... and get dialed in.

VANS HYBRID PLUS

VANS HYBRID

VANS HYBRID PLUS BOA® FIT SYSTEM

The Hybrid Plus system expands the range of flex control from the original Hybrid BOA® configuration by adding an extra BOA® lace that passes around the back of the boot and across the instep to optimize the lines of pull and maximize the flex control capabilities.

VANS HYBRID BOA® FIT SYSTEM

The Hybrid system merges traditional lacing with the power of the BOA® Fit System at the instep and the adjustable flex control of the Custom Slide Guide for secure, targeted heel hold and true custom fit.

BOOT HARNESSES

V3 HARNESS

This advanced support harness delivers our highest level of support to the ankle and instep, keeping the V3 liner and boot shell locked in and connected.

V2 HARNESS

Customize your heel hold with the V2 harness as it works in tandem with the V2 liner to provide enhanced support and personalized fit.

V1 HARNESS

Our lightest and most simple harness is designed to ensure effective support and heel hold when paired with our V1 liner.

VANS HEAT RETENTION 360°

All Vans snowboard boots feature a newly improved thermal retention layer that provides a 360° wrap of the toe box and between the outsole and the liner. This essential layer keeps heat in and cold out, ensuring all-day warmth and comfort.

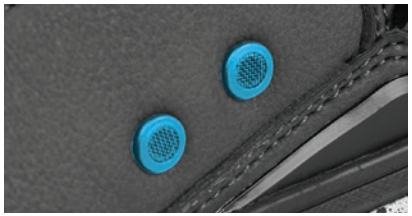

PLEASURECUFF™

The supple elasticity of the PleasureCuff delivers a cushioned, comfortable fit that keeps your calves supported.

INSTEP FLEX ZONE

The Instep Flex Zone functions to maintain natural ankle flexion in your boot, whether in or out of your bindings.

BREATHABLE VALVES

These waterproof valves allow one-way moisture management by transporting moisture away from your foot, ensuring breathability and thermal regulation for dry, comfortable feet.

WATERPROOF ZIPPER SHROUD + D-RING

This feature is a durable and weatherproof fabric shield that protects the lower part of your boot from snow, ice, and moisture, ensuring easy access to your BOA® closure no matter what the weather throws at you. It also features a metal D-ring for securely fastening your pant gaiters to lock out snow.

POWERCUFF STRAP

The PowerCuff Strap provides extra support at the top of the boot for increased stability and response.

EXOCAP

A molded plastic toe cap provides maximum protection and extra space in the toe box to keep your toes wiggling and warm.

BOOT GUIDES

Selecting the right boot isn't always easy. There are a lot of choices and if you're not familiar with all the specific features and benefits of each one, it can be overwhelming. We understand this. So along with the listing of tech features that follows for each boot, you will find three different guides to help you narrow down the right options for you. From selecting a preferred flex to assessing your own skill level (and even the terrain style that you primarily ride) these guides are intended to take away some of the guesswork of finding the boot that best matches your needs.

VANS SKILL LEVEL GUIDE

The Skill Guide allows riders to self-evaluate while selecting boots. Most boots provide ranges from Beginner to Intermediate or Intermediate to Advanced, although some boots are specific to Beginner or Advanced riders. Selecting a range and boot that best match your current skill level increases your chances of finding the best possible fit for you.

BEGINNER

INTERMEDIATE

ADVANCED

VANS FLEX GUIDE

Our flex rating provides a point reference for how boots within the Vans line compare in flexibility. A lower number designates a softer-flexing boot; higher numbers designate a more supportive boot. Boots equipped with the Vans Flex Control System, PowerCuff Strap, and Hybrid Plus systems will have larger ranges, indicating the scope of flex within which each boot can be adjusted.

MOST FLEX  **MOST SUPPORT**

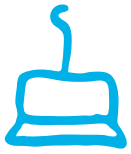

TERRAIN GUIDE

Similar to the Skill Level Guide, when riders are selecting a boot they should self-evaluate the terrain style that they primarily ride. Again, most boots offer ranges from Park/Street to All-Mountain or All-Mountain to Big Mountain/Backcountry, but some are specific to certain terrains. It's optimal to select a boot that best fits the terrain that you ride most frequently.

BACKCOUNTRY

Purpose-built for steep, deep, untouched terrain, above treeline and beyond the boundaries.

ALL-MOUNTAIN

Optimized for versatility, from parks and powder to side hits, rails, and everything in between.

PARK / STREET

Adapted to the technical terrain of parks, transitions, and urban environments.

LINE ARCHITECTURE

Line architecture is a framework that simplifies how we think and talk about our boots by creating clearly defined product levels. This structure makes it easier for us to communicate consumer choices based on user benefits and needs, rather than specific features or price points.

TOP SHELF

VANS' MOST CUSTOMIZABLE, TECHNICALLY ADVANCED, AND PERFORMANCE-FOCUSED LEVEL OF PRODUCT.

PRO SPEC

DEFINED BY INNOVATIVE AND FUNCTIONAL TEAM-TESTED TECHNOLOGIES AND ELEVATED COMFORT FEATURES.

PRO G SPEC

THE FLEX AND PLAYFULNESS OF OUR OG SPEC WITH TOPSHELF COMFORT & WARMTH.

OG SPEC

CLASSIC VANS STYLE BUILT WITH PROVEN COMFORT AND PERFORMANCE FOR ALL CONDITIONS.

LINERLESS

VANS' LINERLESS COLLECTION PROVIDES LIGHTWEIGHT CONSTRUCTION THAT REDEFINES SIMPLICITY AND MODERN COMFORT.

FRANCHISES

A product franchise is a grouping of products based on similarities and common lineage. Think of it as an expandable family of products with a well-defined identity, making it easier to tell strong, consistent product stories. Franchising also makes it easier to understand and relate to specific products when choosing which is best for you. Each of these franchise platforms represents a specific set of values and spec levels that define our most popular products.

AURA

- Men's BOA® product
- Vans brand DNA in look and feel
- Product designed for Vans enthusiasts looking for BOA® closure technology
- Intended for high levels of rideable versatility and cross-terrain performance

INVADO

- Men's Hybrid BOA® product
- Classic Vans aesthetic with progressive closure technology
- Purpose-built for cross-functional, variable terrain use
- Intended to perform at a high level with customizable closure and support

HI-STANDARD™

- Men's and women's lace product
- Offers our most classic Vans brand looks
- Product designed and built for our most expressive of creators and lace purists
- Intended to offer style, performance, and comfort from peaks to parking lots

ENCORE

- Women's BOA® product
- Vans brand DNA in look and feel
- Product designed for Vans enthusiasts looking for BOA® closure technology
- Intended for all-day, everyday comfort and performance

Men’s Snowboard Boots

INFUSE

The Infuse is about performance. Always has been. Always will be. Since its earliest iterations, the drive towards progression has been central to its design. And this hands-down, next-level, best-in-class Infuse will reset your expectations of what a snowboard boot should be. Loaded with top-shelf features and the Vans Hybrid Plus BOA® Fit System, it's got just about everything you've ever wanted in a snowboard boot. Question is—what're you gonna do with it?

INFUSE SIDELINE

Drawing inspiration and design language from the heart of snow surfing's origin in Japan, the Infuse Sideline snowboard boot embodies the fluid and artistic mindset of utilizing natural mountain contours for an unparalleled ride. This new model combines a V2 outsole, complemented by a V3 liner and footbed to deliver top-tier comfort and performance. The oversized PleasureCuff™ helps increase the boot's range of motion while navigating turns effortlessly, while an asymmetrical flex pattern creates enhanced mobility to ensure versatile and fluid rides from edge to edge. Experience the fusion of Japanese-inspired culture and high-end performance design in every carve with the Infuse Sideline boot.

INFUSE SIDELINE LX

To be super honest, the Infuse Sideline LX was never intended to become a new model, but that's just the magic of creating with Ryo. What started as a co-curated color story on an Infuse Sideline evolved into a product so uniquely different that we were forced to give it its own name. Functionally, this boot shares the same combined V2 and V3 components as its Sideline cousin, but the big difference comes through in the materialization: A premium black leather shell with an oversized corduroy PleasureCuff™ sitting on a new custom V2 crepe outsole. It's trimmed with a faux-croc skin Sidestripe™, custom Japanese-inspired lace aglets and hooks, and stud embellishments. Familiar? Definitely. Elevated enough to earn an LX signifier? Absolutely.

INVADO PRO 2.0

The Invado Pro just might be the unsung hybrid hero of the Vans Snow collection. A blend of V2 performance, mid-flex, and nostalgic design has made this cult classic a favorite among our team riders and the core community alike, so the redesign had to strike the right balance—familiar enough for current fans, but modern enough to create real excitement on the sales floor and in the lift line.

The Invado Pro 2.0 continues to live on our V2 platform with our UltraCush™ Smartwool® liner, a V2 PopCush™ footbed, and a V2 Waffle Pro outsole, but brings newly updated lines across the eyerows and upper-quarter patterns, a reshaped toe box, and no-sew details throughout. We offset the modernized feel with a retro D-ring lacing system to make sure we didn't lose its classic appeal, and updated the Vans Hybrid BOA® Fit System with the Vans Custom Slide Guide to now be powered by BOA®'s all-new H5 dial platform. The result is a micro-adjustable, multi-directional fit engineered for precision tightening or loosening on the fly. Tag in Rene and our friends at Souvenir to help bring this new model to life, and this unsung hero is about to get a lot more attention.

INVADO OG 2.0

As we wrapped up the redesign of the Pro, we quickly turned our sights to the OG. From a functional standpoint, we couldn't be happier with the current V1 platform, featuring the V1 UltraCush™ liner, V1 PopCush™ footbed, and a V1 Waffle Lug outsole. Instead, we focused on modernizing the pattern to allow for more flowing lines, a redesigned toe box, and our tested-and-true Vans Hybrid BOA® Fit System with Vans Custom Slide Guide featuring the M+2 dial. The result? A fun-flexing, modern-looking hybrid boot with superior heel hold adjustability at virtually the same incredible value.

VERSE 2.0

Our crown jewel, the Verse has been widely regarded as one of the most versatile, technical all-mountain boots in snowboarding. For Winter 2026/2027, we set out with an ambitious goal: To reimagine what our highest expression of a snowboard boot could be.

This isn't an update. This is a completely new boot, redesigned from the ground up to deliver a lighter, slimmer profile with a stiffer, performance-led flex. Powered by the BOA® Fit System with the all-new dual H5 dial platform and the Vans Custom Slide Guide, the Verse 2.0 delivers precision, finite adjustability, and unmatched power. Add a newly designed ExoCap for protection, our new two-zone shroud for weather protection, and an all-new V3 outsole, and the Verse 2.0 is more equipped than ever for deep backcountry missions, side hits, or simply destroying resort groomers. A new expression from top to bottom, the Verse 2.0 represents the next generation of Vans Snow performance and protection.

AURA PRO 2.0

Maintaining its roots in comfort, control, and style, this season's Aura Pro 2.0 comes with an updated modern look and a slightly stiffer flex profile to continue delivering on its versatile, hardworking reputation as the BOA® boot built to perform in all environments. It features a dual-zone custom focus BOA® Fit System with the all new H5 dial platform for a micro-adjustable, precision fit coupled with the Vans Custom Slide Guide for exceptional heel hold. Add in the V2 UltraCush™ Smartwool® liner and V2 Waffle Pro outsole, the Aura Pro 2.0 will exceed your expectations of comfort and performance.

AURA OG 2.0

Drafting off the update of its Pro sibling, the new season brings a full redesign of the Aura OG. With simplicity at its core, the new design continues our proven V1 platform: A V1 Ultra-Cush™ liner, a V1 PopCush™ footbed, and a V1 Waffle Lug outsole. The redesigned outer shell brings bold new lines for a modernized look, a deeper drop to the extended PleasureCuff™ for added comfort and fit, and a reshaped toe box for a cleaner profile. The single-dial BOA® Fit System has been upgraded to BOA's all-new H5 dial platform offering a micro-adjustable and multi-directional precision fit. Modern, simple, lightweight—and unmistakably Vans.

HI-COUNTRY™

The Hi-Country is optimized to take your street or backcountry shred game to the next level. Key performance features, like a V3 PopCush™ footbed which offers our highest level of impact cushioning and tuned energy return, the Vans Flex Control System and PowerCuff Strap for custom flex tuning, and a V3 SuperEnduro Waffle outsole, provide the confidence of all-terrain preparedness. A waterproof zipper shroud, D-ring gaiter hooks, one-way breathable valves, and the Vans V3 UltraCush™ TNF FlashDry™ liner promise unmatched moisture management. The Hi-Country will not only take you where you want to go, but it'll give you the tools to show up in style.

SUPER STANDARD

With the boundaries of snowboarding being pushed to unthinkable levels, not all riders are able to relate, and honestly, not all want to! Welcome to the Super Standard. This was our pursuit of mid-level excellence. A nod to the golden era of late '90s snowboarding where a 12-foot air was still massive, and style was everything. Beginning with the flex and playfulness of the Hi-Standard OG and utilizing the warmth and comfort of our V3 liner, V3 footbed, and V1 Waffle Lug outsole, we landed at a great spot but felt it needed just a bit more. We reduced the overall height, added an asymmetrical PleasureCuff™ for extra tweak, and a molded toe cap to keep the top-down looking clean and tight. A new boot, a new tier, and a new level of fun unlocked. This is high-performance, low-fi snowboarding that lives and breathes any place where the snow falls.

Women’s Snowboard Boots

LUNA / PRO 2.0

Kennedi has been putting in work, and the results have been impossible to ignore. TWO recent covers, a standout video part, and a newly released pro boot model kind of speaks for itself! And the craziest part? There's no sign of this slowing down!

When Vans began talking about the riders we wanted to build with for the Winter 2026-2027 season, Kennedi was an easy, unanimous choice. They came to the table with a fully formed concept: A well-worn look inspired by vintage, sun-bleached colors and broken-in canvas—and they were excited to share this through the new Luna Pro 2.0. It feels unmistakably Kennedi, and saying it's well-deserved is an understatement.

THE PROGRESS

Unless you've been living on a beach far from the world of snow, you've probably noticed women's snowboarding has been progressing faster than anyone could have ever imagined! The level, the size and the style of progression has outpaced our product offering, and we needed to change that. The Progress is our answer to this new level of women's riding. This is one of our most versatile and technical boots in the line, with a focus on performance, fit, and support. Powered by the BOA® Fit System with the all-new dual H5 dial platform and the Vans Custom Slide Guide, this dual-zone BOA® boot is optimized for precision and power. Complemented with ExoCap protection and a V3 SuperEnduro Waffle outsole, it's at home in the biggest parks, on backcountry missions, or full days destroying resort side hits. This newly designed model is engineered for the best of the best!

MIA BROOKES SIGNATURE

This is a special one. It's been over 25 years since we've had a women's signature product in the Vans Snow line, and that changes for Winter 2026/2027.

Creating a new model for a rider who continues to rewrite what's possible on a snowboard takes some imagination. We knew Mia's boot needed to be a high-performance freestyle model, equally at home on an XXL park jump or a backyard rail setup. We started with a mid-flex profile and loaded it with our best V3 ingredients: A V3 UltraCush™ TNF FlashDry™ liner, a V3 PopCush™ footbed, the all-new V3 All-Trac outsole, and a BOA® Fit System powered by the all-new dual H5 dial platform and Vans Custom Slide Guide.

Mia brought her own early 2000s-inspired color and style direction to tie it all together, and the result is unmistakable—a high-performance, rider-driven boot built to push progression and break whatever boundaries stand in the way.

ENCORE / PRO 2.0

A forever cornerstone in the line, the Encore Pro has always been a dependable option for those looking for style, comfort, and performance in all environments. For Winter 2026-2027, we wanted to turn up the emphasis on style and redesign the look of this proven winner. With fresh new lines and an updated flex profile, the redesigned Encore Pro 2.0 brings some new excitement to one of our most successful women's styles to date. You can still expect unmatched fit through a dual-zone custom focus BOA® Fit System with the all new H5 dial platform for a micro-adjustable, precision fit coupled with the Vans Custom Slide Guide for exceptional heel hold, a V2 UltraCush™ Smartwool® liner and a V2 PopCush™ footbed. And when you put it all together, you'll understand why this might be our favorite new boot in the Winter 2026-2027 collection!

Youth Snowboard Boots

JUVIE OG

The Juvie OG is built to support groms who rip. Complete with a V1 UltraCush™ liner, V1 PopCush™ footbed, and V1 Waffle Lug outsole, this boot matches features with all of Vans' adult-level OG products. When combined with the BOA® Fit System, the Juvie OG is the youth culture's clear choice for progression and undeniable style.

Outerwear & Accessories

MIA BROOKES SIGNATURE OUTERWEAR

How could we not? With a rider who's so expressive in her personal style and basically lives in the snow 360 days a year, it only felt right to give Mia the opportunity to create her own signature collection. With a strong nod to the golden era of snowboarding outerwear, this early 2000s-inspired collection may be style-led, but make no mistake—it's built to ride, bringing Mia's unmistakable style to every lap.

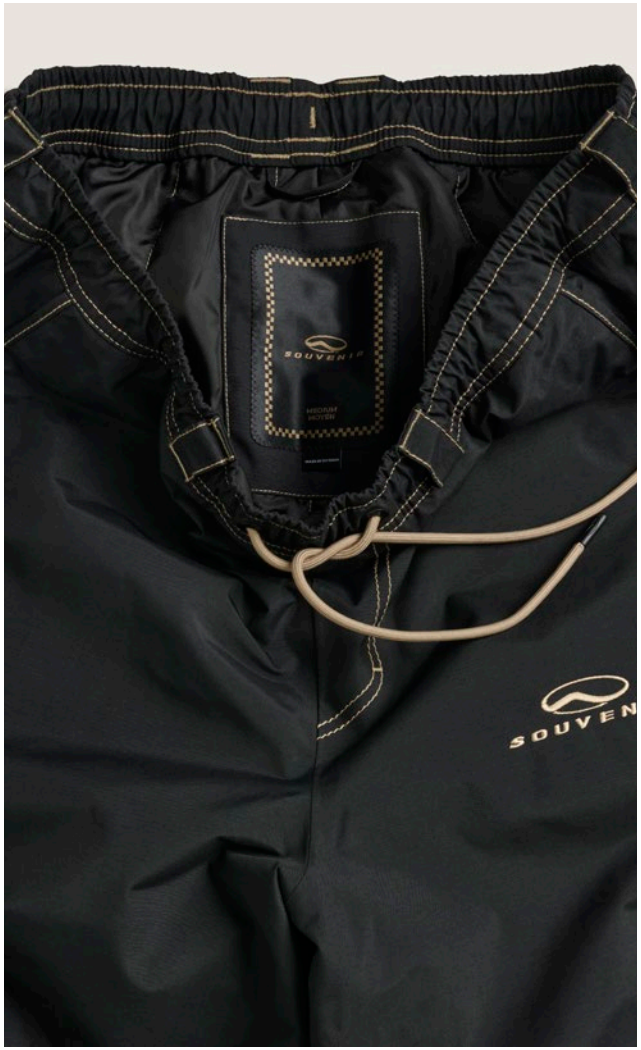

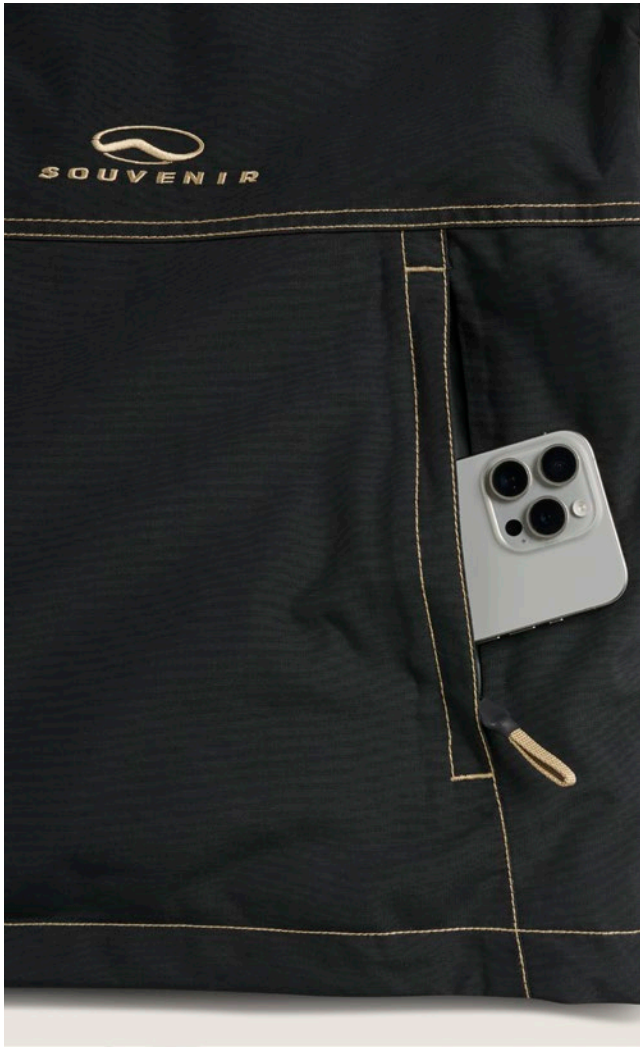

SOUVENIR × VANS SNOW COLLECTION

We've been big fans of Souvenir since they first hit the scene in 2021. Hailing from Montreal, Canada, they've built something truly special through their unique take on outerwear, the team and community they've fostered, and an energy that's hard not to get behind. When the opportunity came to work with this rider-owned and -operated brand, it was a pretty easy "YES!" Two crews with different approaches but a shared love for the culture, coming together on a head-to-toe collection for Winter 2026-2027.

Men’s Outerwear

KINGDOM 2L GORE-TEX® JACKET

Hands down, the Kingdom remains our most technical GORE-TEX® performance jacket in the Winter 2026-2027 collection. From the upper alpine to the valley floor, uphill missions to downhill gold, deep days to stormy ones, there's no better jacket than the Kingdom. A new 2-layer construction keeps the price a little more approachable while still delivering the breathability and waterproofing you expect from GORE-TEX®.

- GORE-TEX® 2L waterproof, breathable, plain-weave 100% recycled polyester with PFAS-free DWR finish
- Exceptional tear resistance
- bluesign®-APPROVED
- Fully Gore-Tex®-taped seams
- Recycled polyester lining
- 2-way center front YKK AquaGuard® zipper
- YKK AquaGuard® zippered chest pockets with phone pocket inside
- Adjustable hook-and-loop cuffs
- Adjustable bungee waist cinch
- Zippered vents
- Internal power mesh goggle pocket
- Peripheral hood adjustment
- Hidden toggle cinch hood
- Zippered sleeve pass pocket
- Silicone heat transfer Vans logo on front and back
- Adjustable stretch zip-out powder skirt with jacket-to-pant clip-on interface

**Made without intentionally added per- and polyfluoroalkyl substances; may contain trace amounts*

DERBY BIG BLOCK

Inspired by the training jackets of the late '90s, the Derby brings that same bold attitude to the mountain. While style leads the way, there's no shortage of snow-ready function: heavy insulation for instant warmth, a 5K DWR coating to keep you dry, and performance trims built for days on snow. Throwback looks, backed by real winter function.

- 100% polyester waterproof, breathable 5K DWR-coated fabric
- PrimaLoft® 3 oz. insulation
- Recycled polyester lining
- Fully taped seams
- Elastic wrist cuffs and hem
- 2-way center front waterproof zipper
- Zippered sleeve pass pocket
- Internal power mesh goggle pocket and zippered chest pocket
- Zip waist pockets
- Mesh zipper vents
- Media cord access
- Peripheral hood adjustment
- Vans snow mountain logo taping details
- Embroidered Vans chest logo
- Jacket-to-pant clip-on interface

PRE-APRES 3-IN-1 JACKET

When convenience and versatility matter most, it's hard to beat a 3-in-1. The Pre-Aprés is built for riders putting in a full day on the hill and definitely sticking around for après. Less about filming a video part and more about being ready for the full mountain experience, the built-in layering system combines serious warmth for cold days, a stripped-back shell for spring laps, and a lightweight puffer for the ride to, the ride from, and everything after. One jacket. Three ways to wear it. All-day versatility.

- Shell: 100% waterproof, breathable 2L PFAS-free DWR nylon
- Removable, insulated liner jacket: 1K 100% quilted polyester with 100% recycled, post-consumer ThermoBall™ polyester fill
- Fully taped seams
- 2-way center front waterproof zipper
- Chest pockets with waterproof zipper and bonded zipper garage
- Zip waist pockets and mesh vents
- Adjustable hook-and-loop cuffs
- Zippered sleeve pass pocket
- Peripheral hood adjustment
- Interior zippered chest pocket
- Adjustable bungee waist cinch
- Embroidered logos
- Adjustable stretch powder skirt with jacket-to-pant clip-on interface

MOCHI PURPLE
VN001262369

MIA BROOKES SIGNATURE JACKET

Mia came into her first signature outerwear project with a pretty specific vision: part bomber, part parka, lightweight, fur-trimmed, and built to ride. The baggy fit keeps things moving, while PrimaLoft® insulation adds warmth without the extra weight. With 5K waterproofing, mesh vents and a waist gaiter, it has everything needed to keep lapping. Big on style. Just technical enough. Very Mia.

- Waterproof, breathable 5K DWR-coated polyester fabric
- Quilted lining with 3 oz. PrimaLoft® insulation
- Faux-fur removable trim at hood
- Recycled polyester lining
- Fully taped seams
- 2-way center front waterproof zipper
- Storm flap with mil-spec slotted button and snap reinforcement
- Zip waist pockets
- Zippered sleeve pass pocket
- Elastic wrist cuffs and waist
- Peripheral hood adjustment
- Internal power mesh goggle pocket and zippered chest pocket
- Zippered mesh vents
- Military-inspired bicep sleeve pocket
- Embroidered Mia Brookes and Vans logo

HOW TO MEASURE:

The ideal fit means better-looking clothes with more comfort.

MEASURING TIPS

- Measure over undergarments, not over clothes or shoes.
- Use a fiberglass tape measure.
- Always keep the tape measure parallel to the floor, and don't let it twist.

CHEST/BUST

With arms relaxed at the side of the body, measure under the arms around the fullest part of the bust.

WAIST

With heels slightly apart, measure around the narrowest part of the waist.

HIPS

With heels slightly apart, measure around the fullest part of the hips.
