design & entwicklung | design & development | design & développement

DE: Schon als Kind war mir klar, dass ich Modedesignerin werden will.

Da das Firmengebäude früher neben meinem Elternhaus war, war es für uns Kinder wie ein großer Spielplatz und die Mitarbeiter wurden zu einer erweiterten Familie zugleich.

Mit acht Jahren gab mir mein Vater die Möglichkeit meine erste kleine Handschuhkollektion zu gestalten. Hierzu habe ich Blätter verwendet, die ich in Erd- und Beertönen auf die Handschuh- und Faustumrisse abdruckte. Die Entwürfe wurden anschließend auf Stoffe umgesetzt und meine erste Kollektion entstand. Dieses Erlebnis hat den Grundstein gelegt, dass ich eine Handschuhdesignerin geworden bin, was in der Komplexität, auch in Bezug auf die Produktentwicklung, nichts einer Modedesignerin nachsteht.

EN: Even as a kid I knew, that I want to become a fashion designer. The companies headquarter was next to our home, so it was like a big playground and the employees became a second family. When I was eight years old my father gave me the opportunity to create my first glove collection. Therefore I pressed leaves in brown and berry tones on the gloves and mittens. The designs were printed on fabrics and my collection was nearly finished. This experience lay the foundation of being a glove designer, what is in no way inferior to being a fashion designer.

FR: Toute petite déjà, je savais que je voulais devenir créatrice de mode.

Puisque le bâtiment de l'entreprise était à côté de chez mes parents, il était pour nous, enfants, une grande aire de jeu et les collaborateurs sont devenus notre famille élargie. Quand j'avais huit ans, mon père m'a donné la possibilité de créer ma première petite collection de gants. Pour cela, j'ai utilisé des feuilles que j'ai appuyées sur les patrons des gants et des mouffles dans des tons de terre et de baies. Ces ébauches ont ensuite été transposées sur des tissus et ma première collection était née. C'est par cette expérience que je suis devenue créatrice de gants ce qui n'a rien à envier à une créatrice de mode, aussi bien en ce qui concerne la complexité que le développement des produits.

ARKTIS GTX

**NEW
DESIGN**

DE: ARKTIS GTX – ein wandelbarer Bergsporthandschuh, der lästiges Übergepäck vermeidet und alles in sich vereint, was man im Hochgebirge braucht. Der Handschuh ist für Tourenger, Eiskletterer und Bergsportler ideal geeignet und ermöglicht bei eisiger Kälte warme Hände, uneingeschränkte Fingerfertigkeit und besten Griff.

Die meisten Bergsportler haben das Problem, dass sie für den Aufstieg einen dünnen Handschuh benötigen und am Gipfel oder bei der Abfahrt ins Tal ein dicker Handschuh zum Einsatz kommt. Eine Gruppe von Skitourenger hat uns diese Anforderungen geschildert und wir haben darauf mit dem wandelbaren Handschuh ARKTIS GTX das Problem gelöst. Der Handschuh besteht aus einer Kombination aus Faust- und Fingerhandschuh. Binnen Sekunden kann der höchst taktile, wasserdichte innen Handschuh mit der, mit einem Magneten fixierten, Faustkappe zu einem warmen Fäustling umgewandelt werden.

EN: ARKTIS GTX - a variable mountaineering glove which avoids excess baggage. The glove unites everything that you need in the mountains. It's qualified for mountaineers, ski tourer and ice climber and enables warm hands, maximum dexterity and a robust grip.

A lot of mountaineers have the problem, that they always need two pairs of gloves when they are in the mountains - a thin glove to go up the mountain and a thick glove to stay and go down the mountain. A ski tourer team told us about this requirements and we started to develop the ARKTIS.

The glove is a combination of a thin and waterproof innerglove and a warm mitten. Within seconds you can change the high dexterity inner glove to a warm mitten - just fold over the mitten cap which is secured with a magnet on the backhand

FR: ARKTIS GTX – des gants de sport de montagne modulables qui évitent le surplus de bagage pénible et qui allie tout ce dont on a besoin en haute montagne. Ce gant est le compagnon idéal pour la randonnée, l'escalade de glacier et le sport de montagne et permet une habilité illimitée et une excellente tenue en main tout en gardant bien au chaud par froid glacial.

La plupart des sportifs de montagne sont confrontés au problème d'avoir besoin de gants fins pour l'ascension et de gants épais au sommet et pour la descente. Un groupe de skieurs de randonnée nous ont fait part de ces défis et nous avons alors résolu le problème avec les gants modulables ARKTIS GTX. Ce modèle est une combinaison de moufles et de gants. En quelques secondes, ce gant à doublure étanche à la sensibilité tactile maximale se transforme en moufles bien chaudes avec l'élément rabattable fixé par un aimant.

leather mitten cover with seamless fingertip construction

ARKTIS LITE

DE: DER ARKTIS LITE - ARKTIS GTX WEITERGEDACHT UND OPTIMIERT! Nach den guten Verkäufen des Arktis GTX und dem eingeholten Feedback von Kunden und Endverbrauchern, war klar: der Wunsch nach einem Handschuh mit herausnehmbaren Innenhandschuh ist groß. Somit haben wir beschlossen, eine zusätzliche Variante des Arktis zu kreieren. Was haben wir getan? Durch das komplette Verzichtens eines Inserts im Innenhandschuh, bietet dieser ein noch besseres Griffgefühl. Weiters kann die Fäustling Hülle komplett ausgezogen werden, bzw. der Innenhandschuh alleine getragen werden.

EN: THE ARKTIS LITE - ARKTIS GTX FURTHER DEVELOPED AND OPTIMISED! After the good sales of the Arktis GTX and the feedback we received from customers and end users, it was clear that there was a great desire for a glove with a removable inner glove. So we decided to create an additional version of the Arktis. What did we do? By completely dispensing with an insert in the inner glove, it offers an even better grip. Furthermore, the mitten shell can be removed completely or the inner glove can be worn on its own.

FR: L'ARKTIS LITE - L'ARKTIS GTX REPENSÉ ET OPTIMISÉ ! Après les bonnes ventes de l'Arktis GTX et les réactions des clients et des utilisateurs finaux, il était clair que le souhait d'un gant avec doublure amovible était grand. Nous avons donc décidé de créer une variante supplémentaire de l'Arktis. Qu'avons-nous fait ? En renonçant complètement à un insert dans le gant intérieur, celui-ci offre une sensation de préhension encore meilleure. De plus, l'enveloppe de la moufle peut être entièrement retirée et le gant intérieur peut être porté seul.

lavalan®

is made of traceable European wool
ist aus rückverfolgbarer europäischer Wolle

lavalan®

is solely produced in Germany
wird ausschließlich in Deutschland hergestellt

www.lavalan.com

FOLLOW US

lavalan® is a highly functional fibrefill solely made from natural and renewable raw materials, wool and corn.

Wool is a technically advanced fibre made by nature that provides unmatched breathability, cozy warmth and a constant body climate regardless of activity levels or altering weather conditions. Beside its thermoregulating properties, wool is capable to neutralize bad odours for a longer use without unnecessary wash cycles. This makes lavalan the perfect insulation for everyday life, travel and multiple day mountain adventures.

lavalan® is the sustainable alternative to synthetic fibrefills and is already used in a wide range of products like jackets, gloves, sleeping bags, ski helmets, home textiles and many more.

lavalan® ist eine hochwertige Faserfüllung, die ausschließlich aus natürlichen und nachwachsenden Rohstoffen besteht, Wolle und Mais.

Wolle ist eine „Hightech-Faser“ aus der Natur, die durch ihre unerreichte Atmungsaktivität besticht. Sie sorgt für eine angenehme, wohlige Wärme und ein konstantes Körperklima unabhängig vom Aktivitätsgrad und wechselnden Wetterverhältnissen. Ein weiterer Vorteil neben der Thermoregulierung ist die Geruchsneutralisierung der Wolle. Diese ermöglicht eine lange Verwendung ohne unnötige Waschvorgänge und macht lavalan zur optimalen Isolierung im Alltag, auf längeren Reisen und Bergtouren.

lavalan® ist die nachhaltige Alternative zu synthetischen Faserfüllungen und findet bereits Anwendung in unterschiedlichsten Produkten, wie Jacken, Handschuhen, Schlafsäcken, Skihelmen, Heimtextilien und vielem mehr.

THE FUTURE OF SUSTAINABILITY

ECONOMIC SYSTEMS

LINEAR ECONOMY

Take, make, dispose

The Issue

Depletes finite resources and produces significant waste

RECYCLING ECONOMY

Prolonging resources through reuse

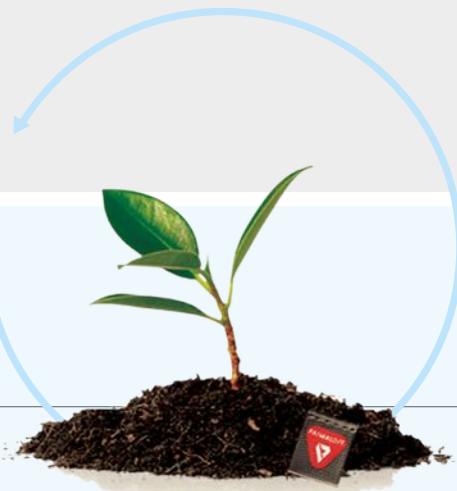

The Issue

Resources can only be traditionally recycled a limited number of times before the quality degrades and it cannot be reused

CIRCULAR ECONOMY

A circular economy is an economic system aimed at minimizing waste and re-capturing usable resources to be utilized within the system. This eliminates the need to introduce new natural resources, creating a closed loop. Resources can be reused over and over again, without losing quality. For polyesters, this is often achieved through chemical recycling

PRIMALOFT® BIO™ AND CIRCULARITY

PrimaLoft® Bio™ is a technology that works in harmony with the circularity model. Specifically designed to return to materials found in nature, PrimaLoft® Bio™ solves for fibers that make their way outside of the closed loop and into the environment – whether through laundering and wear-and-tear during the life of a garment or, if a garment does find its way into a landfill or ocean water

WHAT IS CHEMICAL RECYCLING?

Chemical recycling is a process that breaks down polyester to its basic components, while maintaining their integrity, so that it can be rejuvenated into new high-performance material. This process can be repeated time and again, without any loss in quality

PrimaLoft® Bio™ Fibers Through the Chemical Recycling Process:

- 1 A used garment is returned for recycling
- 2 Materials are separated and sorted
- 3 PrimaLoft® Bio™ fibers are sent to a chemical recycling facility, where they are broken down into their basic components
- 4 PrimaLoft® Bio™ fibers maintain a 95% yield rate through the chemical recycling process
- 5 The same basic components are converted into polyester chips
- 6 The chips are used to produce new, high-performance PrimaLoft® Bio™ fibers
- 7 A new garment is produced with PrimaLoft® Bio™ fibers, beginning the cycle again!

V2.02.22

PRIMALOFT® IS A REGISTERED TRADEMARK OF PRIMALOFT, INC. ©2020 PRIMALOFT, INC.

PRIMALOFT® FIBER

AEROGEL PARTICLES
ARE INFUSED INTO EACH PRIMALOFT® FIBER

**PRIMALOFT® INSULATION
WITH CROSS CORE™**

Composed of more than 95% air, aerogels are the lightest solid materials known to man, as well as one of the most effective insulators. We have fused our best-in-class insulation fibers with aerogel technology to reach previously unattainable levels of lightweight warmth.

Windstopper by GORE-TEX Labs

Handschuhe ausgestattet mit Windstopper by GORE-TEX Labs Produkt-Technologie, bieten absolute Winddichtigkeit, während sie extrem atmungsaktiv sind.

Gloves engineered with Windstopper by GORE-TEX Labs product technology offer absolute windproofness while being extremely breathable.

Les gants dotés de la technologie Windstopper by GORE-TEX Labs sont parfaitement étanches au vent tout en restant extrêmement respirant pour la peau.

Ziegenleder | Soft goat leather hydro | cuir chevreau

Feiner, weicher Griff und dennoch robust. Extrem reißfest, biegsam und sehr widerstandsfähig. Hydrophobiert (wasserabweisend ausgerüstet). Geschmeidig und feinporig. Gefärbt wird das Fell für wirklich gutes Handschuhleder rein Anilin (durchgefärbt im Fass, dadurch atmungsaktiv, geschmeidig und seidenweich). Digitalleder ist eine geprägte Variante für außergewöhnlichen Grip.

A fine, soft texture yet still robust. Highly tear-resistant, pliable and extremely hard wearing. Hydrophobic (excellent water repellent qualities) Smooth and fine pored. The coat for really good glove leather is dyed pure aniline (solid color, breathable, supple and silky smooth). Digital goat leather hydro is an embossed version for better grip.

Toucheur fin et doux et malgré tout, robuste. Indéchirable, flexible et très résistant. Hydrophobe (effort fortment déperlant) Souple et présentant des pores fins. Pour un cuir de très bonne qualité, la peau est teintée à l'aniline (teintée dans la masse, donc respirante, souple et douce comme la soie). Le cuir traité numériquement est un modèle estampé, dédié à une prise en main d'une adhérence exceptionnelle.

Lammlleder | lamb leather | cuir d'agneau

Gutes Lammlleder ist strapazierfähig, weich und geschmeidig. Gefärbt wird das Fell für wirklich gutes Handschuhleder rein Anilin (durchgefärbt im Fass, dadurch atmungsaktiv, geschmeidig und seidenweich).

Good lamb leather is hardwearing, soft and smooth. The coat for really good glove leather is dyed pure aniline (solid color, breathable, supple and silky smooth).

Un bon cuir d'agneau est résistant, doux et souple. Pour obtenir un excellent cuir de gant, la peau est imprégnée avec de la pure aniline (cuir entièrement plongé dans la teinture, ce qui le rend respirant, souple et soyeux).

Amerikanischer Weißwedelhirsch | American white-tailed deer | Cerf américain de Virginie

Die Weißwedelhirsche leben in großen Gebieten oder Gehegen (größtenteils Rocky Mountains), freilaufend und nicht eingeeengt. Die Hirschhäute eignen sich für eine Glatt- oder Nappalederzurichtung, die Gerbung ist eine Chromgerbung, hydrophobiert auf Anilymbasis (nicht pigmentiert).

American white-tailed deer live in large areas or preserves, are free-roaming and not constrained. The deerskins are suitable for smooth or nappa leather dressing, the tanning is chrome tanning, with aniline-based water-repellent finish (not pigmented).

Les cerfs américains de Virginie vivent sur de grands territoires ou de grands enclos, en liberté et sans manquer de place. Les peaux de cerf sont parfaites pour l'apprêt en cuir lisse ou cuir nappa, le tannage est un tannage au chrome, rendu hydrophobe à base d'aniline (non couvert).

Curly (Lampelzvelours) | Curly (lamb velours) | Curly (mouton retourné)

Das sorgfältig ausgewählte Lammfell sorgt für wohlige und kuschelige Wärme in der kalten Jahreszeit. Die Felle stammen aus Neuseeland. Rund 50% der neugeborenen Lämmer sterben am ersten Tag aufgrund der von der Natur gegebenen Selektion. Nur diese Felle werden zur Produktion von Curly-Leder herangezogen. Die feingelockte Naturwolle des Lammfells wird auf der Haut getragen und ersetzt ein eingezogenes Futter.

The carefully selected lambskin provides a pleasant and cosy warmth in the cold season. The hides originate in New Zealand. Around 50% of newborn lambs die on the first day due to natural selection. Only these hides are used for the production of Curly leather. The delicately curled natural wool of the lambskin is worn on the skin and replaces the lining.

Les peaux de mouton soigneusement sélectionnées garantissent une chaleur agréable et douce pendant les périodes les plus froides de l'année. Ces peaux sont originaires de Nouvelle-Zélande. La sélection naturelle fait que quelque 50 % des jeunes agneaux meurent dans les heures qui suivent leur naissance. Seules ces peaux sont utilisées pour la production de cuir Curly, le cuir étant ici tanné avec la laine. La laine naturelle finement bouclée des peaux de mouton est portée sur la peau et remplace une doublure éventuelle. Les boucles de la laine retiennent l'air.

Echte Daune | Real Down | Véritable duvet

Die Daune sieht aus wie eine feine Schneeflocke. Aufgrund ihrer dreidimensionalen Struktur schließt die Daune im Verhältnis zu ihrem Gewicht eine große Menge Luft ein. Sie bildet so eine Schicht nicht wärmeleitender Luft, die vor Kälte schützt.

The downy feather looks like a delicate snowdrop. Because of its three-dimensional structure the feather envelopes a large quantity of air relative to its weight. It therefore forms a layer of non-heat-conducting air which protects against cold.

Le duvet ressemble à de fins flocons de neige. Grâce à sa structure en trois dimensions, le duvet enferme une grande quantité d'air par rapport à son poids. Ainsi, une couche d'air non conducteur de chaleur se forme et protège du froid.

GORE-TEX

Handschuhe ausgestattet mit GORE-TEX Inserts sind **dauerhaft wasserdicht, winddicht und atmungsaktiv** – garantiert. Die Beschreibung der 4 aktuellen Handschuh-Technologien finden Sie unterhalb.

Gloves engineered with GORE-TEX inserts are **durably waterproof, windproof, and highly breathable** – guaranteed. You will find the description of the 4 existing technologies in the diagramm below.

Tous les gants élaborés avec les inserts GORE-TEX sont **durablement imperméables, coupe-vent et respirants**. La description de 4 technologies nouvelles - voir plus bas.

GORE-TEX ePE

Ob Sie mit Freunden auf die Piste gehen oder die Stadt erkunden, Sie brauchen Schutz vor den Elementen. Die neuen GORE-TEX Produkte bieten dauerhafte Leistung und sind ein weiterer Schritt auf dem Weg der Nachhaltigkeit von Gore (www.gore-tex.com/sustainability). Die neuen GORE-TEX Produkte bieten dauerhaft wasserdichten und atmungsaktiven Schutz mit einer langen Produktlebensdauer und sind PFC-frei* mit einem reduzierten CO₂-Fußabdruck**.

*Das Ziel von Gore Fabrics, über den gesamten Lebenszyklus seiner Produkte hinweg frei von umweltschädlichen PFCs zu sein, wird damit weiter verfolgt. In diesem Fall wird das Ziel durch die Verwendung nicht fluorierter Materialien erreicht. Erfahren Sie mehr auf <https://gtx.is/pfcec>

** durch Lamine mit einer neuen Membran mit geringerer Masse und ausgewählten Textilien (nach Higg MSI)

Whether you're hitting the slopes with friends or exploring downtown, you need protection from the elements. The new GORE-TEX products provide durable performance and are a further step on Gore's ongoing sustainability journey (www.gore-tex.com/sustainability). New GORE-TEX products provide durably waterproof and breathable protection with a long product life, and are PFC free* with a reduced carbon footprint**.

*advances Gore Fabrics' goal of being free of PFCs of environmental concern over the lifecycle of its consumer products. In this case, the goal is accomplished using non-fluorinated materials. Learn more on <https://gtx.is/pfcec>

** through laminates with a new lower-mass membrane and select textiles (per Higg MSI)
