GLOVE REVOLUTION SINCE 1912

WINTER 2026 | 27

TRY IT. WEAR IT. (G)LOVE IT.

Glove-making masterpieces for passion and profession

eska®

GLOVE REVOLUTION SINCE 1912

Exzellente Passform.
Maximale Bewegungsfreiheit.
Hochwertige Verarbeitung.
Ausgezeichnete Qualität.
Funktionalität trifft auf Design.
Handschuhspezialisten. Seit 1912.

Excellent fit.
Maximum freedom of movement.
Outstanding quality.
Functionality meets design.
Glove specialists. Since 1912.

Excellente coupe.
Liberté de mouvement maximale.
finition de haute qualité.
Une qualité exceptionnelle.
la fonctionnalité rencontre le design.
Spécialistes des gants. Depuis 1912.

ISPO Gold Award und dem
Red Dot Design Award aus-
gezeichnet
The Arktis GTW wins the ISPO
Gold Award and the Red Dot
Design Award

DIE ZUKUNFT

Das Beste kommt erst!
The best has yet to come!

FOR THE SAKE OF NATURE

As an Austrian glove specialist, sustainability starts with what we put into every glove we produce.

We use recycled fabrics and materials wherever possible, combine pure natural fibres with partly natural innovations, and give existing resources a second life through upcycling.

At the same time, our focus on robust construction and long-lasting quality means our gloves can be worn for many seasons – making them sustainable simply by enduring.

Recycling &
Upcycling

Durability &
Sustainability

Use of natural &
partly natural
materials

ISO-certified
production in
Hungary & Turkey

MORE INFO:

GLOVE SPECIALIST FROM AUSTRIA. SINCE 1912.

MEN & UNISEX

3175 **ARKTIS LITE**

DE: DER ARKTIS LITE - ARKTIS GTX WEITERGEDACHT UND OPTIMIERT! Nach den guten Verkäufen des Arktis GTX und dem eingeholten Feedback von Kunden und Endverbrauchern, war klar: der Wunsch nach einem Handschuh mit herausnehmbarem Innenhandschuh ist groß. Somit haben wir beschlossen, eine zusätzliche Variante des Arktis zu kreieren. Was haben wir getan? Durch das komplette Verzicht auf ein Insert im Innenhandschuh, bietet dieser ein noch besseres Griffgefühl. Weiters kann die Fäustling Hülle komplett ausgezogen werden, bzw. der Innenhandschuh alleine getragen werden.

EN: THE ARKTIS LITE - ARKTIS GTX FURTHER DEVELOPED AND OPTIMISED! After the good sales of the Arktis GTX and the feedback we received from customers and end users, it was clear that there was a great desire for a glove with a removable inner glove. So we decided to create an additional version of the Arktis. What did we do? By completely dispensing with an insert in the inner glove, it offers an even better grip. Furthermore, the mitten shell can be removed completely or the inner glove can be worn on its own.

FR: L'ARKTIS LITE - L'ARKTIS GTX REPENSÉ ET OPTIMISÉ ! Après les bonnes ventes de l'Arktis GTX et les réactions des clients et des utilisateurs finaux, il était clair que le souhait d'un gant avec doublure amovible était grand. Nous avons donc décidé de créer une variante supplémentaire de l'Arktis. Qu'avons-nous fait ? En renonçant complètement à un insert dans le gant intérieur, celui-ci offre une sensation de préhension encore meilleure. De plus, l'enveloppe de la moufle peut être entièrement retirée et le gant intérieur peut être porté seul.

3175 **ARKTIS LITE**

PRIMALOFT® FIBER

AEROGEL PARTICLES
ARE INFUSED INTO EACH PRIMALOFT® FIBERPRIMALOFT® INSULATION
WITH CROSS CORE™

Composed of more than 95% air, aerogels are the lightest solid materials known to man, as well as one of the most effective insulators. We have fused our best-in-class insulation fibers with aerogel technology to reach previously unattainable levels of lightweight warmth.

THE FUTURE OF SUSTAINABILITY

ECONOMIC SYSTEMS

CIRCULAR ECONOMY

A circular economy is an economic system aimed at minimizing waste and re-capturing usable resources to be utilized within the system. This eliminates the need to introduce new natural resources, creating a closed loop. Resources can be reused over and over again, without losing quality. For polyesters, this is often achieved through chemical recycling

PRIMALOFT® BIO™ AND CIRCULARITY

PrimaLoft® Bio™ is a technology that works in harmony with the circularity model. Specifically designed to return to materials found in nature, PrimaLoft® Bio™ solves for fibers that make their way outside of the closed loop and into the environment – whether through laundering and wear-and-tear during the life of a garment or, if a garment does find its way into a landfill or ocean water

WHAT IS CHEMICAL RECYCLING?

Chemical recycling is a process that breaks down polyester to its basic components, while maintaining their integrity, so that it can be rejuvenated into new high-performance material. This process can be repeated time and again, without any loss in quality

PrimaLoft® Bio™ Fibers Through the Chemical Recycling Process:

- 1 A used garment is returned for recycling
- 2 Materials are separated and sorted
- 3 PrimaLoft® Bio™ fibers are sent to a chemical recycling facility, where they are broken down into their basic components
- 4 PrimaLoft® Bio™ fibers maintain a 95% yield rate through the chemical recycling process
- 5 The same basic components are converted into polyester chips
- 6 The chips are used to produce new, high-performance PrimaLoft® Bio™ fibers
- 7 A new garment is produced with PrimaLoft® Bio™ fibers, beginning the cycle again!

V2.02.22

PRIMALOFT® IS A REGISTERED TRADEMARK OF PRIMALOFT, INC. ©2020 PRIMALOFT, INC.

PRIMALOFT® FIBER

AEROGEL PARTICLES
ARE INFUSED INTO EACH PRIMALOFT® FIBER**PRIMALOFT® INSULATION
WITH CROSS CORE™**

Composed of more than 95% air, aerogels are the lightest solid materials known to man, as well as one of the most effective insulators. We have fused our best-in-class insulation fibers with aerogel technology to reach previously unattainable levels of lightweight warmth.

Windstopper® by GORE-TEX Labs®

Handschuhe ausgestattet mit Windstopper® by GORE-TEX Labs® Produkt-Technologie, bieten absolute Winddichtigkeit, während sie extrem atmungsaktiv sind.

Gloves engineered with Windstopper® by GORE-TEX Labs® product technology offer absolute windproofness while being extremely breathable.

Les gants dotés de la technologie Windstopper® by GORE-TEX® Labs sont parfaitement étanches au vent tout en restant extrêmement respirant pour la peau.

Ziegenleder | Soft goat leather hydro | cuir chevreau

Feiner, weicher Griff und dennoch robust. Extrem reißfest, biegsam und sehr widerstandsfähig. Hydrophobiert (wasserabweisend ausgerüstet). Geschmeidig und feinporig. Gefärbt wird das Fell für wirklich gutes Handschuhleder rein Anilin (durchgefärbt im Fass, dadurch atmungsaktiv, geschmeidig und seidenweich). Digitalleder ist eine geprägte Variante für außergewöhnlichen Grip.

A fine, soft texture yet still robust. Highly tear-resistant, pliable and extremely hard wearing. Hydrophobic (excellent water repellent qualities) Smooth and fine pored. The coat for really good glove leather is dyed pure aniline (solid color, breathable, supple and silky smooth). Digital goat leather hydro is an embossed version for better grip.

Toucher fin et doux et malgré tout, robuste. Indéchirable, flexible et très résistant. Hydrophobe (effort et fortment déperlant) Souple et présentant des pores fins. Pour un cuir de très bonne qualité, la peau est teintée à l'aniline (teintée dans la masse, donc respirante, souple et douce comme la soie). Le cuir traité numériquement est un modèle estampé, dédié à une prise en main d'une adhérence exceptionnelle.

Lammlleder | lamb leather | cuir d'agneau

Gutes Lammlleder ist strapazierfähig, weich und geschmeidig. Gefärbt wird das Fell für wirklich gutes Handschuhleder rein Anilin (durchgefärbt im Fass, dadurch atmungsaktiv, geschmeidig und seidenweich).

Good lamb leather is hardwearing, soft and smooth. The coat for really good glove leather is dyed pure aniline (solid color, breathable, supple and silky smooth).

Un bon cuir d'agneau est résistant, doux et souple. Pour obtenir un excellent cuir de gant, la peau est imprégnée avec de la pure aniline (cuir entièrement plongé dans la teinture, ce qui le rend respirant, souple et soyeux).

Amerikanischer Weißwedelhirsch | American white-tailed deer | Cerf américain de Virginie

Die Weißwedelhirsche leben in großen Gebieten oder Gehegen (größtenteils Rocky Mountains), freilaufend und nicht eingeeignet. Die Hirschhäute eignen sich für eine Glatt- oder Nappalederzurichtung, die Gerbung ist eine Chromgerbung, hydrophobiert auf Anilinfarbe (nicht gedeckt).

American white-tailed deer live in large areas or preserves, are free-roaming and not constrained. The deerskins are suitable for smooth or nappa leather dressing, the tanning is chrome tanning, with aniline-based water-repellent finish (not pigmented).

Les cerfs américains de Virginie vivent sur de grands territoires ou de grands enclos, en liberté et sans manquer de place. Les peaux de cerf sont préparées pour l'appât en cuir lisse ou cuir nappa, le tannage est un tannage au chrome, rendu hydrophobe à base d'aniline (non couvert).

Echte Daune | Real Down | Véritable duvet

Die Daune sieht aus wie eine feine Schneeflocke. Aufgrund ihrer dreidimensionalen Struktur schließt die Daune im Verhältnis zu ihrem Gewicht eine große Menge Luft ein. Sie bildet so eine Schicht nicht wärmeleitender Luft, die vor Kälte schützt.

The downy feather looks like a delicate snowdrop. Because of its three-dimensional structure the feather envelopes a large quantity of air relative to its weight. It therefore forms a layer of non-heat-conducting air which protects against cold.

Le duvet ressemble à de fins flocons de neige. Grâce à sa structure en trois dimensions, le duvet enferme une grande quantité d'air par rapport à son poids. Ainsi, une couche d'air non conducteur de chaleur se forme et protège du froid.

GORE-TEX®

Handschuhe ausgestattet mit GORE-TEX® Inserts sind **dauerhaft wasserdicht, winddicht und atmungsaktiv** – garantiert. Die Beschreibung der 4 aktuellen Handschuh-Technologien finden Sie unterhalb.

Gloves engineered with GORE-TEX® inserts are **durably waterproof, windproof, and highly breathable** – guaranteed. You will find the description of the 4 existing technologies in the diagram below.

Tous les gants élaborés avec les inserts GORE-TEX® sont **durablement imperméables, coupe-vent et respirants**. La description de 4 technologies nouvelles - voir plus bas.

GORE-TEX® ePE

Ob Sie mit Freunden auf die Piste gehen oder die Stadt erkunden, Sie brauchen Schutz vor den Elementen. Die neuen GORE-TEX® Produkte bieten dauerhafte Leistung und sind ein weiterer Schritt auf dem Weg der Nachhaltigkeit von Gore (www.gore-tex.com/sustainability). Die neuen GORE-TEX® Produkte bieten dauerhaft wasserdichten und atmungsaktiven Schutz mit einer langen Produktlebensdauer und sind PFC-frei* mit einem reduzierten CO₂-Fußabdruck**.

*Das Ziel von Gore Fabrics, über den gesamten Lebenszyklus seiner Produkte hinweg frei von umweltschädlichen PFCs zu sein, wird damit weiter verfolgt. In diesem Fall wird das Ziel durch die Verwendung nicht fluorierter Materialien erreicht. Erfahren Sie mehr auf <https://gtx.is/pfcec>

** durch Laminates mit einer neuen Membran mit geringerer Masse und ausgewählten Textilien (nach Higg MSI)

Whether you're hitting the slopes with friends or exploring downtown, you need protection from the elements. The new GORE-TEX® products provide durable performance and are a further step on Gore's ongoing sustainability journey (www.gore-tex.com/sustainability).

New GORE-TEX® products provide durably waterproof and breathable protection with a long product life, and are PFC free* with a reduced carbon footprint**.

*advances Gore Fabrics' goal of being free of PFCs of environmental concern over the lifecycle of its consumer products. In this case, the goal is accomplished using non-fluorinated materials. Learn more on <https://gtx.is/pfcec>

** through laminates with a new lower-mass membrane and select textiles (per Higg MSI)
