THE PROGRESS FEATURING MIA BROOKES

Fall '26 brings the introduction of one of our most technical women's snowboard boots to date, so who better to help bring this model to life than one of the most progressive female riders on the planet—Mia Brookes. When she's not too busy elevating snowboarding's bar of possibility or dropping edits with the platinum crew, she's expressing herself through ink, paint, and paper, making her a dream to collaborate with. Bold blocking, bright colors and 2K-inspired ... what more could we possibly ask from this rising star?

THE SUPER STANDARD FEATURING RYO AIZAWA

A NEW tier, a NEW boot, a NEW global team rider ... it's pretty rare for a rider to embody such a unique and creative style that it literally requires a new product to accurately represent him. From the moment Ryo started popping into our feed, we knew we needed to give him a product platform to express himself, and what better product than the boot inspired by his approach to snowboarding. We couldn't have scripted a better story if we tried!

THE INFUSE FEATURING CANNON CUMMINS

Hailing from the Pacific Northwest and raised on the steep slopes of Mt. Baker, Cannon has been busy rewriting the definition of all mountain freestyle snowboarding. Bringing a strong skate aesthetic to the backcountry, Cannon's flow and creativity made him the perfect candidate to not only uplift the Infuse, but serve as the anchor in our first core exclusive offering.

THE TAKE UP 2L GORE-TEX® SHELL FEATURING JILL PERKINS

If we wanted to be taken seriously in the Outerwear space for Fall '26, we knew we needed to show up with a diverse assortment that was not only created with the guidance of our team, but literally cosigned in performance, fit, and feel. When sharing our ideas, there are few voices in the room louder than Jill Perkins, and that's our favorite thing about her. For Fall '26, we worked with Jill to help introduce our new tier of GORE-TEX through the introduction of the Take Up 2L GORE-TEX® Shell in her custom Vintage Cocoa colorway.

Technology

POPCUSH™

Won't pack. Pops back.

Vans' highest level of impact cushioning coupled with energy return for snowboarding, skateboarding, or BMX.

ULTRACUSH™

UltraCush is a performance foam compound developed by Vans for enhanced comfort and reduced weight.

VANS POPCUSH™ V-SERIES FOOTBEDS

Comfort and support are the foundation of snowboard boots, and the POPCUSH V-Series footbeds from Vans define both. With advanced 3D anatomical shaping and an anti-fatigue PU materialization and design, these footbeds offer an innovative formula that provides tuned energy return and the highest levels of impact cushioning. Tested and approved by our team riders, the POPCUSH V-Series footbeds deliver the kind of comfort and performance that only Vans can provide.

"The POPCUSH footbeds hit different. Jumping off buildings, flying off cliffs, or standing and shoveling all day—the comfort and support is always there with the anti-fatigue PU material. No matter what the terrain or journey is, I always feel confident knowing that I'm walking on POPCUSH."

—Kennedi Deck, Vans Snow Team Rider

V3 POPCUSH FOOTBED

- Tri-density POPCUSH construction
- OrthoLite® open-cell foam top layer
- TPU arch support heel clip provides stability while allowing torsional flex
- Advanced 3D-molded anatomical shape
- Anti-fatigue coring design
- Airflow perforations
- Nylex moisture-wicking top sheet

V2 POPCUSH FOOTBED

- Dual-density POPCUSH construction
- TPU arch support heel clip provides stability while allowing torsional flex
- Advanced 3D-molded anatomical shape
- Anti-fatigue coring design
- Airflow perforations
- Nylex moisture-wicking top sheet

V1 POPCUSH FOOTBED

- Single-density POPCUSH construction
- Advanced 3D-molded anatomical shape
- Anti-fatigue coring design
- Airflow perforations
- Nylex moisture-wicking top sheet

ULTRACUSH

YOUTH ULTRACUSH GROW-WITH-YOU SHIM

Designed for growing feet, this practical youth footbed sits atop a second built-in footbed and can be removed as the foot size grows, adding a half-size of extra room and extending the life of the boot.

VANS / TNF FLASHDRY™

Vans and trailblazing outdoor innovator The North Face® continue their partnership on the first-to-market FlashDry-equipped snowboard boot liner. FlashDry fabric technology is engineered to act like a second skin, pushing moisture to the surface and eliminating it as fast as possible. These fabrics are engineered to repel and resist wetting out to help provide quick-drying performance that keep the user dry and comfortable. Setting a new industry standard in moisture management and all-conditions comfort, this technology has now been integrated into all of the Vans V3 UltraCush™ TNF FlashDry liners.

VANS / SMARTWOOL®

Vans continues our partnership with the Merino wool experts at Smartwool with the V2 UltraCush™ Smartwool liner, made with soft, odor-resistant, moisture-managing Merino wool to keep you feeling dry and comfortable even in the deepest powder. Merino wool is warm yet breathable—helping to maintain a dry, thermoregulated microclimate inside your boot. As your body heats up, sweat vapor is quickly absorbed by the wool fiber and transported away from your skin. A Merino fiber can absorb and retain up to 30% of its own weight in moisture and still feel dry to the touch. This makes it perfect for everything from long runs on groomers to backcountry explorations. Forget about heading in early—the V2 UltraCush™ Smartwool liner will help you stay warm, dry, and ready for the last chair.

VANS V-SERIES ULTRACUSH™ LINERS

Our mission with the entire offering of V-Series liners is to have a simple and comfortable way to optimize boot fit and performance. Fewer seams, UltraCush-level comfort packages, and neoprene flex zones are just a few of the features that set Vans liners apart. These designs represent the most advanced concepts ever delivered from Vans. As in previous years, all V3 liners incorporate The North Face's FlashDry™ technology, and all V2 liners come outfitted with Smartwool™ Merino wool. Be prepared to reset your expectations.

V3 ULTRACUSH TNF FLASHDRY LINER

- UltraCush interior cushioning layer
- The North Face FlashDry materialization
- Expanded Comfort Flex neoprene forefoot
- Updated X-Cage for superior heel hold
- Dual-density, heat-moldable core
- Closed-seam microsuede cuff and tongue

V3 RANGE EDITION LINER

The V3 Range Edition liner offers all the same great features as its V3 counterpart, but adds the extended and lower-reaching PleasureCuff™. When combined with the Adaptive Range Mode, expect an unmatched range of motion when hiking or skinning.

X-CAGE

This heel lock component offers an asymmetrical, anatomical shape that fills the space around your ankle bones with a soft durometer EVA foam. Available on the V2 UltraCush Smartwool and V3 UltraCush FlashDry liners, the X-Cage is designed to keep your foot securely in the heel pocket and in constant contact with your snowboard.

V2 ULTRACUSH SMARTWOOL LINER

- UltraCush interior cushioning layer
- Smartwool Merino wool materialization
- Extended Comfort Flex neoprene toe box
- Updated X-Cage for superior heel hold
- Dual-density, heat-moldable core

V1 ULTRACUSH LINER

- UltraCush interior cushioning layer
- Dual-density, heat-moldable core
- Comfort Flex neoprene toe box
- Closed-seam brushed fleece cuff

VANS V-SERIES SNOWWAFFLE OUTSOLES

Vans SnowWaffle outsoles are engineered to optimize two things: boardfeel and traction. A quality connection to your snowboard provides the ability to be both proactive and reactive. In parallel, balancing traction needs from parking lots and lift lines to backcountry hikes is paramount to our SnowWaffle outsoles, and 50+ years of traction development technology from Vans helps to inform these designs.

V3 SUPERENDURO WAFFLE OUTSOLE

Inspired by the extended cross-country and off-road demands of moto enduro racing, the V3 SuperEnduro outsole is designed to offer maximum performance in and out of your bindings. Multi-directional tread design? Surface-level texturing? A TPU toe pick? Check, check, and check. There's no keeping up with this all-terrain apex predator.

- **ALL-TRAC** Rubber Compound
- Molded TPU toe pick
- Multi-directional, dynamic lug tread pattern
- Surface-level waffle ripple for added traction and snow shed
- UltraCush Lite midsole construction with mid-foot support shank
- Expanded impact absorption zone

ALL-TRAC

All-Trac is formula-based, proprietary rubber compound developed by Vans. This specialized cold weather recipe is optimized with increased flexibility, which allows lugs to bend with terrain changes, creating more surface area and better variable adaptability.

V2 WAFFLE PRO

The V2 Waffle Pro is a progressively inspired and capability-driven design built for both on- and off-snowboard performance. Uncompromising natural flex and a weight-reducing, impact-resistant UltraCush midsole provide incredible boardfeel, while a Vans-exclusive pattern and rubber compound give you the confidence you need to scramble the side country with confidence.

- **ALL-TRAC** Rubber Compound
- Dynamic lug tread pattern features a siped tire-like design for increased traction
- Toe picking treads and a higher toe bumper for grip and protection
- UltraCush Lite midsole construction for lightweight, impact-absorbing performance

V1 WAFFLE LUG

The original Vans waffle outsole is an iconic skate classic, and the V1 Waffle Lug outsole pays tribute to the timeless vulcanized look that put Vans on the map. Expect high levels of boardfeel and traction from the Waffle Lug outsole.

- **ALL-TRAC** Rubber Compound
- Aggressive reverse waffle lug pattern for all-mountain and street performance
- Vans' special recipe rubber compound for all-condition traction

LINERLESS TECHNOLOGY

The bottom line: Linerless technology redefines simplicity and modern comfort. Its lightweight construction and slimmed-down upper reduces a boot's overall size and weight. An increased internal foam package provides a softer, more cushioned feel. Without internal harnessing, riders will experience unmatched ease in and out of the boot. A calculated combination of support and free-flex articulation makes linerless technology ideal for performance, street, or park riders choosing the Hi-Standard™ DX boot, or skill- and price-conscious riders looking for value and comfort in the new Aura, Encore, Hi-Standard™, or Juvie linerless models.

VANS FLEX CONTROL SYSTEM (PATENT PENDING)

Our removable, high-rebound Hytrel® tongue stiffeners enable riders to custom-tune their boot flex. Keep both in for maximum support, use just one for increased lateral or medial response, or take them both out for a softer-flexing boot. As your boots soften up over time, add the tongue stiffeners back in to extend the life of your boots.

REMOVABLE INTERNAL TONGUE STIFFENERS

ADAPTIVE RANGE MODE

The functional objective of Adaptive Range Mode is to widen the opening of the snowboard boot to allow for a more natural gait and extended range of motion on overland adventures or commuting uphill travel. Whether on a splitboard, approach skis, or just going for a good old-fashioned walk for that fresh line, disengaging the Ride Mode strap opens the Rear Drop-Cuff and two-way stretch gore, providing significantly more calf articulation. This allows for longer strides and subsequently less wasted energy.

When combined with the V3 Range Edition UltraCush™ TNF FlashDry™ liner, which offers an extended and lower-reaching PleasureCuff™, the result is an unmatched range of motion. In Ride Mode or Range Mode, the Adaptive Range Mode feature turns any boot into a freeride and backcountry tool.

WATERPROOF ZIPPER SHROUD + D-RING

This feature is a durable and weatherproof fabric shield that protects the lower part of your boot from snow, ice, and moisture, ensuring easy access to your BOA® closure no matter what the weather throws at you. It also features a metal D-ring for securely fastening your pant gaiters to lock out snow.

POWERCUFF STRAP

The PowerCuff Strap provides extra support at the top of the boot for increased stability and response.

EXOCAP

A molded plastic toe cap provides maximum protection and extra space in the toe box to keep your toes wiggling and warm.

BOOT HARNESSSES

V3 HARNESS

This advanced support harness delivers our highest level of support to the ankle and instep, keeping the V3 liner and boot shell locked in and connected.

V2 HARNESS

Customize your heel hold with the V2 harness as it works in tandem with the V2 liner to provide enhanced support and personalized fit.

V1 HARNESS

Our lightest and most simple harness is designed to ensure effective support and heel hold when paired with our V1 liner.

VANS HEAT RETENTION 360°

All Vans snowboard boots feature a newly improved thermal retention layer that provides a 360° wrap of the toe box and between the outsole and the liner. This essential layer keeps heat in and cold out, ensuring all-day warmth and comfort.

INSTEP FLEX ZONE

The Instep Flex Zone functions to maintain natural ankle flexion in your boot, whether in or out of your bindings.

PLEASURECUFF™

The supple elasticity of the PleasureCuff delivers a cushioned, comfortable fit that keeps your calves supported.

BREATHABLE VALVES

These waterproof valves allow one-way moisture management by transporting moisture away from your foot, ensuring breathability and thermal regulation for dry, comfortable feet.

THE BOA® FIT SYSTEM

Vans has backed BOA® since day one. As the proven leader, the BOA® Fit System delivers a fast, effortless, precision fit. Offering on-the-fly micro-adjustability for unmatched adjustment and custom fit, our latest range of BOA® boots is—top to bottom—our best collection to date.

THE BOA®
GUARANTEE

BOA® DELIVERS

DIALED-IN PERFORMANCE AND MICRO-ADJUSTABLE, PRECISION FIT.

Dialed-in, micro-adjustable precision fit designed to give riders the freedom to adjust tension and regulate boot flex. Engineered to withstand impact from the most demanding riders, BOA delivers uncompromising durability in the park or technical backcountry terrain.

THE BOA® FIT SYSTEM FEATURING VANS CUSTOM FOCUS PLUS

Custom Focus Plus features two high-power (H4) dials that control three zones of fit linked by Vans' exclusive Custom Slide Guide, delivering concentrated fit around the instep area for superior heel hold.

THE BOA® FIT SYSTEM FEATURING VANS CUSTOM FOCUS

Custom Focus features a high-power coiler dial (H4) and a mid-power remote dial (M3v2) to control three zones of fit linked by Vans' exclusive Custom Slide Guide, delivering concentrated fit around the instep area for focused heel hold.

VANS HYBRID AND HYBRID PLUS SYSTEMS FEATURING THE CUSTOM SLIDE GUIDE (PATENT PENDING)

Both Hybrid fit systems put comfort and control at your fingertips. This tech combo enables adjustable flex control and powerful heel hold through the instep area using the Custom Slide Guide. Simply slide it to where you need it ... and get dialed in.

VANS HYBRID PLUS

VANS HYBRID

VANS HYBRID PLUS BOA® FIT SYSTEM

The Hybrid Plus system expands the range of flex control from the original Hybrid BOA® configuration by adding an extra BOA® lace that passes around the back of the boot and across the instep to optimize the lines of pull and maximize the flex control capabilities.

VANS HYBRID BOA® FIT SYSTEM

The Hybrid system merges traditional lacing with the power of the BOA® Fit System at the instep and the adjustable flex control of the Custom Slide Guide for secure, targeted heel hold and true custom fit.

BOOT GUIDES

Selecting the right boot isn't always easy. There are a lot of choices and if you're not familiar with all the specific features and benefits of each one, it can be overwhelming. We understand this. So along with the listing of tech features that follows for each boot, you will find three different guides to help you narrow down the right options for you. From selecting a preferred flex to assessing your own skill level (and even the terrain style that you primarily ride) these guides are intended to take away some of the guesswork of finding the boot that best matches your needs.

VANS SKILL LEVEL GUIDE

The Skill Guide allows riders to self-evaluate while selecting boots. Most boots provide ranges from Beginner to Intermediate or Intermediate to Advanced, although some boots are specific to Beginner or Advanced riders. Selecting a range and boot that best match your current skill level increases your chances of finding the best possible fit for you.

BEGINNER

INTERMEDIATE

ADVANCED

VANS FLEX GUIDE

Our flex rating provides a point reference for how boots within the Vans line compare in flexibility. A lower number designates a softer-flexing boot; higher numbers designate a more supportive boot. Boots equipped with the Vans Flex Control System, PowerCuff Strap, and Hybrid Plus systems will have larger ranges, indicating the scope of flex within which each boot can be adjusted.

MOST FLEX

MOST SUPPORT

TERRAIN GUIDE

Similar to the Skill Level Guide, when riders are selecting a boot they should self-evaluate the terrain style that they primarily ride. Again, most boots offer ranges from Park/Street to All-Mountain or All-Mountain to Big Mountain/Backcountry, but some are specific to certain terrains. It's optimal to select a boot that best fits the terrain that you ride most frequently.

BACKCOUNTRY

Purpose-built for steep, deep, untouched terrain, above treeline and beyond the boundaries.

ALL-MOUNTAIN

Optimized for versatility, from parks and powder to side hits, rails, and everything in between.

PARK / STREET

Adapted to the technical terrain of parks, transitions, and urban environments.

LINE ARCHITECTURE

Line architecture is a framework that simplifies how we think and talk about our boots by creating clearly defined product levels. This structure makes it easier for us to communicate consumer choices based on user benefits and needs, rather than specific features or price points.

FRANCHISES

A product franchise is a grouping of products based on similarities and common lineage. Think of it as an expandable family of products with a well-defined identity, making it easier to tell strong, consistent product stories. Franchising also makes it easier to understand and relate to specific products when choosing which is best for you. Each of these franchise platforms represents a specific set of values and spec levels that define our most popular products.

AURA

- Men's BOA® product
- Vans brand DNA in look and feel
- Product designed for Vans enthusiasts looking for BOA® closure technology
- Intended for high levels of rideable versatility and cross-terrain performance

INVADO

- Men's Hybrid BOA® product
- Classic Vans aesthetic with progressive closure technology
- Purpose-built for cross-functional, variable terrain use
- Intended to perform at a high level with customizable closure and support

HI-STANDARD™

- Men's and women's lace product
- Offers our most classic Vans brand looks
- Product designed and built for our most expressive of creators and lace purists
- Intended to offer style, performance, and comfort from peaks to parking lots

ENCORE

- Women's BOA® product
- Vans brand DNA in look and feel
- Product designed for Vans enthusiasts looking for BOA® closure technology
- Intended for all-day, everyday comfort and performance

Men's Snowboard Boots

INFUSE

The Infuse is about performance. Always has been. Always will be. Since its earliest iterations, the drive towards progression has been central to its design. And this hands-down, next-level, best-in-class Infuse will reset your expectations of what a snowboard boot should be. Loaded with top-shelf features and the Vans Hybrid Plus BOA® Fit System, it's got just about everything you've ever wanted in a snowboard boot. Question is—what're you gonna do with it?

INVADO / OG

The Invado OG combines a Vans classic look with the solution to an age-old snowboarding problem—the lack of a decent heel hold. The Vans' Hybrid BOA® Fit System merges traditional lacing and the power of BOA® closure at the instep with the Custom Slide Guide to provide targeted and instant customizable heel hold in any terrain or situation. This makes the Invado OG an easy choice for any rider looking for style and performance at an incredible value.

VERSE RANGE EDITION

Designed to support overland adventures and uphill travel, this upgraded version of the Verse is intended to be a functional and reliable addition to any backcountry toolkit. The Range Edition's Adaptive Range Mode features a Range Limiter and Rear Drop-Cuff that can be unlocked to widen the top opening of the boot for a significantly expanded range of motion. Skinning a switchback, punching up for quick pow scores, ripping the snowmobile deep into the hills, or just going for a good old-fashioned hike, the Verse Range Edition gets you there with less effort and more protective versatility than ever before.

VERSE

The Verse has long been regarded as one of the most versatile technical terrain boots available today. And this next iteration brings generational advancements in both performance and protection. With a BOA® Fit System featuring Vans Custom Focus Plus routing and Custom Slide Guide, the Verse is optimized for precision and power. Complemented by ExoCap protection and a V3 SuperEnduro Waffle outsole, it's also well-outfitted for backcountry missions and more capable of destroying resort groomers than ever before. Top to bottom, the newly redesigned Verse is engineered to be in a class of its own.

AURA PRO 2.0

Maintaining its roots in comfort, control, and style, the Fall '26 Aura Pro 2.0 comes with an updated modern look and a slightly stiffer flex profile to continue delivering on its versatile, hardworking reputation as the BOA® boot built to perform in all environments. It features a dual-zone custom focus BOA® Fit System for unlimited, on-the-fly micro-adjustability backed by the customizable comfort and heel hold of the Vans Custom Slide Guide. Add in the V2 UltraCush™ Smartwool® liner and V2 Waffle Pro outsole, the Aura Pro 2.0 will exceed your expectations of comfort and performance.

HI-COUNTRY™

The Hi-Country is optimized to take your street or backcountry shred game to the next level. Key performance features, like a V3 POPCUSH™ footbed which offers our highest level of impact cushioning and tuned energy return, the Vans Flex Control System and PowerCuff Strap for custom flex tuning, and a V3 SuperEnduro Waffle outsole, provide the confidence of all-terrain preparedness. A waterproof zipper shroud, D-ring gaiter hooks, one-way breathable valves, and the Vans V3 UltraCush™ TNF FlashDry™ liner promise unmatched moisture management. The Hi-Country will not only take you where you want to go, but it'll give you the tools to show up in style.

SUPER STANDARD

With the boundaries of snowboarding being pushed to unthinkable levels, not all riders are able to relate, and honestly, not all want to! Welcome to the Super Standard. This was our pursuit of mid-level excellence. A nod to the golden era of late '90s snowboarding where a 12-foot air was still massive, and style was everything. Beginning with the flex and playfulness of the Hi-Standard OG and utilizing the warmth and comfort of our V3 liner, V2 footbed, and V1 Waffle Lug outsole, we landed at a great spot but felt it needed just a bit more. We reduced the overall height, added an asymmetrical PleasureCuff™ for extra tweak, and a molded toe cap to keep the top-down looking clean and tight. A new boot, a new tier, and a new level of fun unlocked.

TECH SPECIFICATIONS

Women's Snowboard Boots

LUNA PRO 2.0

Reimagining a classic is never an easy task, but when that classic also has a cult following, it's even more daunting. As we began building the Fall '26 collection we knew we wanted to update the Luna Pro but preserve its blend of utilitarian fashion and Vans' heritage aesthetic. We paid homage to this boot's iconic DNA, while reimagining it with an incredible modern look and feel. Pro spec features and Vans' Hybrid BOA® Fit System continue to be the heart of this boot, and continue to fuel its position as an elite offering for our true core of committed snowboarding women up on the hill.

THE PROGRESS

Unless you've been living on a beach far from the world of snow, you've probably noticed women's snowboarding has been progressing faster than anyone could have ever imagined! The level, the size and the style of progression has outpaced our product offering, and we needed to change that. The Progress is our answer to this new level of women's riding. This is one of our most versatile and technical boots in the line, with a focus on performance, fit, and support. With a BOA® Fit System featuring Vans Custom Focus Plus routing and Custom Slide Guide, this dual-zone BOA® boot is optimized for precision and power. Complemented with ExoCap protection and a V3 SuperEnduro Waffle outsole, it's at home in the biggest parks, on backcountry missions, or full days destroying resort side hits.

This newly designed model is engineered for the best of the best!

ENCORE PRO 2.0

A forever cornerstone in the line, the Encore Pro has always been a dependable option for those looking for style, comfort, and performance in all environments. For Fall '26, we wanted to turn up the emphasis on style and redesign the look of this proven winner. With fresh new lines and an updated flex profile, the redesigned Encore Pro 2.0 brings some new excitement to one of our most successful women's styles to date. You can still expect unmatched fit and comfort through our dual-zone BOA® Fit System featuring Vans Custom Focus for unlimited, on-the-fly micro-adjustability, backed by the customizable comfort and heel hold of the Custom Slide Guide, a V2 UltraCush™ Smartwool® liner and a V2 POPCUSH™ footbed. And when you put it all together, you'll understand why this might be our favorite new boot in the Fall '26 collection!

Outerwear & Accessories

KINGDOM 3L GORE-TEX® SHELL

Introducing the Kingdom 3L GORE-TEX® shell, our new crown jewel in technical outerwear performance. Unmatched breathability and water protection, constructed using one the most advanced fabrics in the GORE-TEX arsenal in a relaxed Vans fit.

- 3-layer, heavyweight plain weave Recycled Polyester fabric
- Canvas optic with good tear resistance
- Laminated to a Nylon Tricot backer
- bluesign® approved
- PFAS-free* DWR
- Fully seam-sealed & water-repellent with AquaGuard® zippers
- Adjustable cuffs, hem, hood, & powder skirt
- Zippered vents
- Chest pockets with dual zippers
- Peripheral hood adjustment
- Hidden toggle cinch hood
- Media cord access

*Made without intentionally added per- and polyfluorinated substances; may contain trace amounts

TAKE UP 2L GORE-TEX® SHELL

Utility function meets snow performance. The Take Up 2L GORE-TEX® shell pulls queues from modern workwear and blends them with unmatched technical fabrics. Slightly cropped, dropped shoulders and oversized front panel pockets make this coat a stand-out in the line. If that alone doesn't get you, Jill Perkins serves up her own endorsed colorway for the Fall '26 season, making this jacket one to chase!

- 2-layer, plain weave Recycled Polyester
- Exceptional tear resistance
- bluesign® approved
- PFAS-free* DWR
- Fully seam-sealed & water-repellent with AquaGuard® zippers
- Adjustable cuffs, hem, hood, & powder skirt
- Zippered vents
- Chest pockets with dual zippers
- Peripheral hood adjustment
- Hidden toggle cinch hood
- Media cord access

*Made without intentionally added per- and polyfluorinated substances; may contain trace amounts

HI-COUNTRY™ 2L GORE-TEX® SHELL

Team designed, team tested, team approved! The Hi-Country shell is back in the line for the Fall '26 season but has been upgraded to a premium 2L GORE-TEX fabric. We added a bit of overall length to the cut of the jacket but didn't stray too far from its classic boxy cut. When an original is remastered, you know it's gonna be great!!

- 2-layer, plain weave Recycled Polyester
- Exceptional tear resistance
- bluesign® approved
- PFAS-free* DWR
- Fully seam-sealed & water-repellent with AquaGuard® zippers
- Adjustable cuffs, hem, hood, & powder skirt
- Zippered vents
- Chest pockets with dual zippers

STUBA MID LAYER JACKET

With the introduction of GORE-TEX®, we found a mid-layer insulator to round out the line. Technical enough to pair with a shell, but stand-alone cool to be worn alone, the Stuba serves as our true transition jacket. Pair it with GORE-TEX® as a mid-weight layer for added warmth on a big shred day, or run it solo when the weather is playing nice!

- 100% Recycled Nylon
- Elastic wrist cuffs with hidden waist cinch
- Fleece-lined front pockets with internal stash zone

XS-XXL
Available September 1, 2026

KINSMAN DOWN PUFFER

When cold is TOO cold, there is no better friend than a down puffer. For the East Coast storm chasers, the preseason sessions in Ruka, the early mornings in Jackson, and for EVERY filmer who ever stood on the side of a mountain half frozen—THIS one is for you!

- 2-layer, 10K-rated 100% Polyester exterior with 100% Recycled Polyester lining
- 600 down fill (certified responsibly sourced)
- Chest stow pocket
- Fully seam-sealed
- Reinforced panels
- Adjustable hem and hood cinches
- Adjustable wrist cuffs

XS-XXL
Available September 1, 2026

KINGDOM 3L GORE-TEX® PANT

A true complement to its jacket upper, the Kingdom 3L GORE-TEX® Pant pairs perfectly as our best-in-class performance bottom. Featuring unmatched breathability, water protection, and storm-sealed construction—built with one of the most advanced fabrics in the GORE-TEX arsenal. A relaxed fit and undeniably Vans.

- 3-layer, heavyweight, plain weave Recycled Polyester fabric
- Canvas optic with good tear resistance
- Laminated to a Nylon Tricot backer
- bluesign® approved
- PFAS-free* DWR
- Fully seam-sealed with AquaGuard® zippers
- Adjustable hem cinch and waistband
- Stretch gaiter with boot clip
- Mesh-lined, zippered vents
- Reinforced knee panels
- Powder skirt attachments
- Cargo & back pockets

*Made without intentionally added per- and polyfluorinated substances; may contain trace amounts

HI-COUNTRY 2L GORE-TEX® PANT

Micro refinements with a massive fabric upgrade, the Hi-Country Pant is back in the Fall '26 collection. Along with our new 2L GORE-TEX® quality with its standard fully taped seams and AquaGuard® zippers at thigh pocket closures, this pant also features side venting for quick thermal regulation and adjustable waist and cuff hems ... served up in a modern, relaxed fit that's at home in any condition!

- 2-layer, plain weave Recycled Polyester
- Exceptional tear resistance
- bluesign® approved
- PFAS-free* DWR
- Fully seam-sealed with AquaGuard® zippers
- Adjustable hem cinch and waistband
- Stretch gaiter with boot clip
- Reinforced knee panels
- Powder skirt attachments
- Cargo & back pockets

DEEP DAZE GORE-TEX® BIB

Big days on the mountain often require a little extra attention, and nothing performs like a bib pant ... especially if that bib is constructed using 2L GORE-TEX. Whether it's a morning chase in two feet of blower, a big day in the backcountry pushing possibilities, or storm boarding with your crew, this pant is designed to keep the snow out and you dry. A modern loose fit, classic function, and 100% tomahawk-approved. Please enjoy responsibly.

- Plain weave Recycled Polyester
- Exceptional tear resistance
- bluesign® approved
- PFAS-free* DWR
- Fully seam-sealed with AquaGuard® zippers
- Deep side zip entry for easy on/off
- Elastic adjustable shoulder straps
- Adjustable hem cinch and waistband
- Front stow chest pocket
- Stretch gaiter with boot clip
- Powder skirt attachments
- Cargo & back pockets

*Made without intentionally added per- and polyfluorinated substances; may contain trace amounts

KINGVALE 2L PARK PANT 2.0

Somewhere between streetwear and outerwear lives the shell pant. Truly at home running night laps at your local park or prowling the city for street spots and spring shreds with your friends, this modern, loose cut, low-tech fit will keep you dry while looking like dry doesn't matter. Easy to wear and even easier on your wallet!

- 2-layer, 10,000mm-rated, 100% Recycled Polyester ripstop fabric
- Fully seam-sealed
- Adjustable elastic waist with web belt
- Elastic cuffs to let those boots shine

EG CARGO SNOW PANT

Drafting inspo from early para pants, these military spec-inspired cargos offer a loose modern fit with some forward design cues. Oversized front thigh pockets and contrast pop stitching might be the standouts, but these pants come with all the snow performance trims you could ask for.

- 2-layer, 100% 10,000mm-rated Nylon
- Fully seam-sealed
- Adjustable hem cinch & waistband
- Stretch gaiter with boot clip
- Powder skirt attachments
- Mesh zipper vents
- Cargo & back pockets

WOMEN'S	S	M	L	XL	XXL	--

HOW TO MEASURE:

The ideal fit means better-looking clothes with more comfort.

MEASURING TIPS

- Measure over undergarments, not over clothes or shoes.
- Use a fiberglass tape measure.
- Always keep the tape measure parallel to the floor, and don't let it twist.

CHEST/BUST

With arms relaxed at the side of the body, measure under the arms around the fullest part of the bust.

WAIST

With heels slightly apart, measure around the narrowest part of the waist.

HIPS

With heels slightly apart, measure around the fullest part of the hips.
